

malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to NESHAP. This information is being collected to assure compliance with 40 CFR part 63, subpart NNNN.

Form Numbers: None.

Respondents/affected entities:

Facilities that perform surface coating of large household and commercial appliances and related parts.

Respondent's obligation to respond:

Mandatory (40 CFR part 63, subpart NNNN).

Estimated number of respondents: 10 (total).

Frequency of response: Initially, occasionally, and semiannually.

Total estimated burden: 3,870 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$429,000 (per year), which includes \$5,400 in annualized capital/startup and/or operation & maintenance costs.

Changes in the Estimates: There is an adjustment decrease in the total estimated burden as currently identified in the OMB Inventory of Approved Burdens. This increase is not due to any program changes. The change in the burden and cost estimates occurred due to a decrease in the total number of facilities subject to the NESHAP. The estimate is based on EPA's recent reevaluation of the source category inventory associated with the recently-proposed amendments to 40 CFR part 63, subpart NNNN (83 FR 46262, September 12, 2018). Per EPA's reevaluation, the number of respondents in the source category has decreased from the estimates in the 2002 final rule because the final rule included assumptions regarding several facilities that were not major sources of HAP. Additionally, there have been changes within the large appliance surface coating industry that result in fewer facilities being subject to the NESHAP. For example, many facilities that used liquid coatings have switched to powder coatings, or have switched to plastic parts and stainless steel instead of painted steel parts, or are using precoated metal coils instead of coating finished parts. As a result, there is a much smaller number of major sources. In addition to the burden decrease from the decreased number of respondents, there is also a burden decrease in the operating and maintenance costs due to the determination that only one affected source uses an emission control device to comply with the NESHAP. These

changes result in an overall decrease in the labor hours O&M costs, and number of responses.

Courtney Kerwin,

Director, Regulatory Support Division.

Meetings of the Local Government Advisory Committee and the Small Communities Advisory Subcommittee

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Local Government Advisory Committee (LGAC) will meet in Washington, DC, on Thursday, May 2, 2019, 9:30 a.m.–5:35 p.m. (EDT), and Friday, May 3, 2019, 10:00 a.m.–12:30 p.m. (EDT). The focus of the Committee meeting will be on issues pertaining to water and water infrastructure issues; Waters of the U.S., emerging contaminants; superfund and brownfields; risk communication and other issues in EPA's Strategic Plan. The Small Communities Advisory Subcommittee (SCAS) will meet in Washington, DC, on Friday, May 3, 2019, 8:00 a.m.–9:00 a.m. (EDT). The Subcommittee will discuss water infrastructure, community revitalization, agricultural issues, and other issues and recommendations to the Administrator regarding environmental issues affecting small communities.

These are open meetings, and all interested persons are invited to participate. The SCAS will hear comments from the public between 8:40 a.m. and 8:45 a.m. on Friday, May 3, 2019. The LGAC will hear comments from the public between 10:20 a.m. and 10:30 a.m. on Friday, May 3, 2019. Individuals or organizations wishing to address the Subcommittee or the
