Committee will be allowed a maximum of five minutes to present their point of view. Also, written comments should be submitted electronically to eargle.frances@epa.gov for the LGAC and to mercurio.cristina@epa.gov for the SCAS. Please contact the Designated Federal Officers (DFO) at the numbers listed below to schedule a time on the agenda. Time will be allotted on a first-come first-serve basis, and the total period for comments may be extended if the number of requests for appearances requires it.

ADDRESSES: The Local Government Advisory Committee meetings will be held at the U.S. Environmental Protection Agency, Conference Room 1153, William Jefferson Clinton EPA East Building, 1201 Constitution Avenue NW, Washington, DC 20460. The Small Communities Advisory Subcommittee meetings will be held at the U.S. Environmental Protection Agency, Conference Room 1153, William Jefferson Clinton EPA East Building, 1201 Constitution Avenue NW, Washington, DC 20460. Meeting summaries will be available after the meeting online at www.epa.gov/ocir/scas-lgac/lgac_index.htm and can be obtained by written request to the DFO.

FOR FURTHER INFORMATION CONTACT: Local Government Advisory Committee (LGAC) contact Frances Eargle, Designated Federal Officer, at (202) 564–3115 or email at eargle.frances@epa.gov and Small Communities Advisory Subcommittee (SCAS), contact Cristina Mercurio, Designated Federal Officer, at (202) 564–6481 or email at mercurio.cristina@epa.gov.

Information on Services for Those With Disabilities: For information on access or services for individuals with disabilities, please contact Frances Eargle at (202) 564–3115 or email at eargle.frances@epa.gov. To request accommodation of a disability, please request it 10 days prior to the meeting, to give EPA as much time as possible to process your request.

Dated: March 11, 2019.

Jack Bowles,
Director, State and Local Relations, Office of Congressional and Intergovernmental Relations.

Ambient Air Monitoring Reference and Equivalent Methods; Designation of One New Equivalent Method

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of the designation of a new equivalent method for monitoring ambient air quality.

SUMMARY: Notice is hereby given that the Environmental Protection Agency (EPA) has designated one new equivalent method for measuring concentrations of ozone (O₃) in ambient air.

SUPPLEMENTARY INFORMATION: In accordance with regulations at 40 CFR part 53, the EPA evaluates various methods for monitoring the concentrations of those ambient air pollutants for which EPA has established National Ambient Air Quality Standards (NAAQS) as set forth in 40 CFR part 50. Monitoring methods that are determined to meet specific requirements for adequacy are designated by the EPA as either reference or equivalent methods (as applicable), thereby permitting their use under 40 CFR part 58 by States and other agencies for determining compliance with the NAAQS. A list of all reference or equivalent methods that have been previously designated by EPA may be found at http://www.epa.gov/ttn/antic/criteria.html.

The EPA hereby announces the designation of one new equivalent method for measuring concentrations of O₃ in ambient air. This designation is made under the provisions of 40 CFR part 53, as amended on October 26, 2015 (80 FR 65291–65468).

The new equivalent method for O₃ is an automated method (analyzer) utilizing the measurement principle based on UV photometry. This newly designated equivalent method is identified as follows:

EQOA–0219–251, “KENTEK Inc. Model MEZUS 410 O₃ Analyzer,” UV photometric analyzer operated in a range of 0–0.5 ppm, with 0.5 μm, 47 mm diameter Teflon® filter installed, operated at temperatures between 20 °C and 30 °C, with temperature and pressure compensation, at a nominal sampling flow rate of 800 cc/min, using a 5 minute averaging time, with either 105VAC–125VAC or 200VAC–240VAC input power options installed, 230-watt power consumption, equipped with 7 inch LCD touch screen display, and operated according to the KENTEK Inc. Model MEZUS 410 Ozone Analyzer User’s Instruction Manual.

This application for a reference method determination for this O₃ method was received by the Office of Research and Development on January 29, 2019. This analyzer is commercially available from the applicant, KENTEK Inc., Hansin S–MECA 65, Techno 3-ro, Yuseong-gu, Daejeon 34016, Korea.

A representative test analyzer was tested in accordance with the applicable test procedures specified in 40 CFR part 53, as amended on October 26, 2015. After reviewing the results of those tests and other information submitted by the applicant, EPA has determined, in accordance with part 53, that this method should be designated as an equivalent method.

As a designated equivalent method, this method is acceptable for use by states and other air monitoring agencies under the requirements of 40 CFR part 58, Ambient Air Quality Surveillance. For such purposes, this method must be used in strict accordance with the operation or instruction manual associated with the method and subject to any specifications and limitations (e.g., configuration or operational settings) specified in the designated method description (see the identification of the method above).

Consistent or repeated noncompliance with any of these conditions should be reported to: Director, Exposure Methods and Measurement Division (MD–E205–01), National Exposure Research Laboratory, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711.
Designation of this equivalent method is intended to assist the States in establishing and operating their air quality surveillance systems under 40 CFR part 58. Questions concerning the commercial availability or technical aspects of the method should be directed to the applicant.

Dated: March 8, 2019.

Timothy Watkins,
Director, National Exposure Research Laboratory.

FOR FURTHER INFORMATION CONTACT: Jeff Gaines, Office of Resource Conservation and Recovery, (5303P), Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460; telephone number: 703–308–8655; fax number: 703–308–8617; email address: gaines.jeff@epa.gov.

SUPPLEMENTARY INFORMATION:
Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at www.regulations.gov or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202–566–1744. For additional information about EPA’s public docket, visit http://www.epa.gov/dockets.

Abstract:
Under the authority of sections 3004, 3005, 3008 and 3010 of the Resource Conservation and Recovery Act (RCRA), as amended, EPA revised the RCRA hazardous waste permitting program to allow a “standardized permit.” The standardized permit is available to facilities that generate hazardous waste and routinely manage the waste on-site in non-thermal units such as tanks, containers, and containment buildings. In addition, the standardized permit is available to facilities that receive hazardous waste generated off-site by a generator under the same ownership as the receiving facility, and then store or non-thermally treat the hazardous waste in containers, tanks, or containment buildings. The RCRA standardized permit consists of two components: A uniform portion that is included in all cases, and a supplemental portion that the Director of a regulatory agency includes at his or her discretion. The uniform portion consists of terms and conditions, relevant to the unit(s) at the permitted facility, and is established on a national basis. The Director, at his or her discretion, may also issue a supplemental portion on a case-by-case basis. The supplemental portion imposes site-specific permit terms and conditions that the Director determines necessary to institute corrective action under section 264.101 (or state equivalent), or otherwise necessary to protect human health and the environment. Owners and operators have to comply with the terms and conditions in the supplemental portion, in addition to those in the uniform portion.

Form Numbers: None. Respondents/affected entities: Entities potentially affected by this action are business or other for-profit.
Respondent’s obligation to respond: Voluntary (40 CFR 270.275).
Total estimated number of respondents: 1. Frequency of response: One time.
Total estimated burden: 218 hours per year. Burden is defined at 5 CFR 1320.03(b).
Total estimated cost: $11,612 (per year), includes $525 annualized capital or operation & maintenance costs.
Changes in the Estimates: There is a decrease of 13,730 hours for this renewal. This decrease is based on the decrease from the estimated number of respondents from 86 to 1. In the 13 years since the Standardized Permit Rule was finalized, there has only been one such permit issued.

Courtney Kerwin,
Director, Regulatory Support Division.

FEDERAL COMMUNICATIONS COMMISSION

Information Collection Being Reviewed by the Federal Communications Commission

AGENCY: Federal Communications Commission.
ACTION: Notice and request for comments.
SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act (PRA) of 1995, the Federal Communications Commission (FCC or Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collections. Comments are requested concerning: Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission’s burden estimate; ways to enhance the
