Mail comments to: Office of Administration, Mail Stop: TWFN–7–A60M, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, ATTN: Program Management, Announcements and Editing Staff.

For additional direction on obtaining information and submitting comments, see “Obtaining Information and Submitting Comments” in the SUPPLEMENTARY INFORMATION section of this document.

B. Submitting Comments

Please include Docket ID NRC–2019–0093 in your comment submission. The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC will post all comment submissions at http://www.regulations.gov as well as enter the comment submissions into ADAMS. The NRC does not routinely edit comment submissions to remove identifying or contact information. If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Introduction

The NRC received, by letter dated November 2, 2018, an application (ADAMS Package Accession No. ML18323A197) to amend Materials License No. SNM–928 (ADAMS Accession No. ML110270373), which authorizes possession of Byproduct, Source, and Special Nuclear Material. The objective of the proposed action is to decontaminate and decommission the Cimarron site to permit release for unrestricted use. In accordance with 10 CFR 70.38(g) CERT, submitted a proposed DP. CERT requested a license amendment to incorporate the proposed DP into the license. As part of this license amendment, CERT has also requested several other revisions to the Radioactive Materials License SNM–928. CERT requested revision of the possession limit. License Condition 8(D) authorizes the possession of up to 6,000 kilograms of thorium. CERT states that the last thorium contaminated material was shipped for disposal in 2004. Hence, there is no longer a need for a thorium possession limit. CERT also requested other minor revisions to the possession limit License Condition. CERT requested a revision to the description of the licensed area of the site. The site has been in decommissioning status since 1976 and portions of the site have been released from license by the NRC. This proposed revision would amend the license to redefine the boundaries of the site for decommissioning purposes to accurately reflect the portions of the site where licensed material, which is in groundwater, is currently located and where licensed material would be stored or packaged for disposal. CERT requested deletion of several tie-downs in License Conditions 10 and 27 that are outdated and no longer relevant or required and revisions to License Condition 27 to reflect the groundwater remediation plan in the proposed DP. As noted, the site has been in decommissioning status since 1976 and various decommissioning activities specified in the license are complete or are no longer required due to changes in the decommissioning schedule and the description of the licensed site. CERT requested a revision to License Condition 23 to reflect the current status of the disposal cell area, which was maintained for the 5-year period required by the NRC with no evidence of subsidence or erosion. Finally, CERT requested that the license be amended to incorporate a revision to its Radiation Protection Program. On February 14, 2011, License SNM–928 was transferred from the previous licensee to CERT (ADAMS Package Accession No. ML110270370). Under License Condition 27(e), CERT can make revisions to its Radiation Protection Plan (RPP) without NRC approval, provided that certain conditions are met. Since the license was transferred to CERT, the RPP has been revised to reflect changes in the license and the licensee’s organization. The purpose of this revision is to incorporate the revised RPP, which was submitted as an appendix to the proposed DP. Since the Cimarron site has been in decommissioning status, materials and equipment, buildings and structures, and surface and subsurface soils have been decommissioned and much of the original site has been released from license. Previous licensees of the site relied on monitored natural attenuation to reduce uranium concentrations in the groundwater to levels that would meet the NRC’s criteria for unrestricted use. However, in some portions of the site, uranium in both groundwater exceeds the NRC’s criteria for unrestricted use. Should the NRC accept CERT’S request to incorporate the proposed DP into the license, pursuant to License Condition 27(b), CERT will begin active groundwater remediation with the goal of meeting the 180 picoCuries per liter total uranium criteria for unrestricted use to enable NRC to terminate License SNM–928. Upon completion of an acceptance review, the NRC found the application acceptable for a detailed technical review (ADAMS Package Accession No. ML19056A513). Prior to issuance of the requested license amendment, the NRC will need to make the findings required by the Atomic Energy Act of 1954 as amended (the Act), and the NRC’s regulations. The NRC’s findings will be documented in a safety evaluation report. The NRC will also perform an environmental assessment in accordance with the requirements of the National Environmental Policy Act and the NRC’s regulations.

III. Notice and Solicitation of Comments

In accordance with section 20.1405 of title 10 of the Code of Federal Regulations (10 CFR), the Commission is providing notice and soliciting comments from local and State governments in the vicinity of the site and any Indian Nation or other indigenous people that have treaty or statutory rights that could be affected by the decommissioning. This notice and solicitation of comments is published pursuant to 10 CFR 2.1005, which provides for publication in the Federal Register and in a forum, such as local newspapers, letters to State or local organizations, or other appropriate forum, that is readily accessible to individuals in the vicinity of the site. Comments should be provided by May 10, 2019.

IV. Opportunity To Request a Hearing and Petition for Leave To Intervene

Within 60 days after the date of publication of this notice, any persons (petitioner) whose interest may be affected by this action may file a request for a hearing and petition for leave to intervene (petition) with respect to the action. Petitions shall be filed in accordance with the Commission’s “Agency Rules of Practice and Procedure” in 10 CFR part 2. Interested persons should consult a current copy of 10 CFR 2.309. The NRC’s regulations are accessible electronically from the NRC Library on the NRC’s website at http://www.nrc.gov/reading-rm/doc-collections/cfr/. Alternatively, a copy of the regulations is available at the NRC’s Public Document Room, located at One White Flint North, Room O1–F21, 11555 Rockville Pike (first floor), Rockville, Maryland 20852. If a petition is filed, the Commission or a presiding officer will rule on the petition and, if appropriate, a notice of a hearing will be issued.

As required by 10 CFR 2.309(d) the petition should specifically explain the reasons why intervention should be permitted with particular reference to the following general requirements for standing: (1) The name, address, and
should state the nature and extent of the petitioner’s interest in the proceeding. The petition should be submitted to the Commission no later than 60 days from the date of publication of this notice. The petition must be filed in accordance with the filing instructions in the “Electronic Submissions (E-Filing)” section of this document, and should meet the requirements for petitions set forth in this section. Alternatively, a State, local governmental body, Federally-recognized Indian Tribe, or agency thereof, may submit a petition to the NRC to intervene. Parties have the opportunity to present evidence, consistent with the NRC’s regulations, policies, and procedures. Petitions must be filed no later than 60 days from the date of publication of this notice. Petitions and motions for leave to file new or amended contents that are filed after the deadline will not be entertained absent a determination by the presiding officer that the filing demonstrates good cause by satisfying the three factors in 10 CFR 2.309(c)(1)(i) through (iii). The petition must be filed in accordance with the filing instructions in the “Electronic Submissions (E-Filing)” section of this document.

A State, local governmental body, Federally-recognized Indian Tribe, or agency thereof, may submit a petition to the Commission to participate as a party under 10 CFR 2.309(h)(1). The petition

Information about applying for a digital ID certificate is available on the NRC’s public website at http://www.nrc.gov/site-help/e-submittals/getting-started.html. Once a participant has obtained a digital ID certificate and a docket has been created, the participant can then submit adjudicatory documents. Submissions must be in portable document format (PDF). Additional guidance on PDF submissions is available on the NRC’s public website at http://www.nrc.gov/site-help/electronic-sub-ref-mat.html. A filing is considered complete at the time the document is submitted through the NRC’s E-Filing system. To be timely, an electronic filing must be submitted to the E-Filing system no later than 11:59 p.m. Eastern Time on the due date. Upon receipt of a transmission, the E-Filing system time-stamps the document and sends the submitter an email notice confirming receipt of the document. The E-Filing system also distributes an email notice that provides access to the document to the NRC’s Office of the General Counsel and any others who have advised the Office of the Secretary that they wish to participate in the proceeding, so that the filer need not serve the document on those participants separately. Therefore, applicants and other participants (or their counsel or representative) must apply for and receive a digital ID certificate before adjudicatory documents are filed so that they can obtain access to the documents via the E-Filing system.

A person filing electronically using the NRC’s adjudicatory E-Filing system may seek assistance by contacting the NRC’s Electronic Filing Help Desk through the “Contact Us” link located on the NRC’s public website at http://www.nrc.gov/site-help/e-submittals.html, by email to MSHD.Resource@nrc.gov, or by a toll-
free call at 1–866–672–7640. The NRC Electronic Filing Help Desk is available between 9 a.m. and 6 p.m., Eastern Time, Monday through Friday, excluding government holidays.

Participants who believe that they have a good cause for not submitting documents electronically must file an exemption request, in accordance with 10 CFR 2.302(g), with their initial paper filing stating why there is good cause for not filing electronically and requesting authorization to continue to submit documents in paper format. Such filings must be submitted by: (1) First class mail addressed to the Office of the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, Attention: Rulemaking and Adjudications Staff; or (2) courier, express mail, or expedited delivery service to the Office of the Secretary, 11555 Rockville Pike, Rockville, Maryland 20852, Attention: Rulemaking and Adjudications Staff.

Participants filing adjudicatory documents in this manner are responsible for serving the document on all other participants. Filing is considered complete by first-class mail as of the time of deposit in the mail, or by courier, express mail, or expedited delivery service upon depositing the document with the provider of the service. A presiding officer, having granted an exemption request from using E-Filing, may require a participant or party to use E-Filing if the presiding officer subsequently determines that the reason for granting the exemption from use of E-Filing no longer exists.

Documents submitted in adjudicatory proceedings will appear in the NRC’s electronic hearing docket which is available to the public at https://adams.nrc.gov/ehd, unless excluded pursuant to an order of the Commission or the presiding officer. If you do not have an NRC-issued digital ID certificate as described above, click cancel when the link requests certificates and you will be automatically directed to the NRC’s electronic hearing docket where you will be able to access any publicly available documents in a particular hearing docket. Participants are requested not to include personal privacy information, such as social security numbers, home addresses, or personal phone numbers in their filings, unless an NRC regulation or other law requires submission of such information. For example, in some instances, individuals provide home addresses in order to demonstrate proximity to a facility or site. With respect to copyrighted works, except for limited excerpts that serve the purpose of the adjudicatory filings and would constitute a Fair Use application, participants are requested not to include copyrighted materials in their submission.

Dated at Rockville, Maryland, on April 4, 2019.

For the Nuclear Regulatory Commission.

John R. Tappert,
Director, Division of Decommissioning, Uranium Recovery and Waste Programs, Office of Nuclear Material Safety and Safeguards.
