

pursuing damages, including those intended to penalize the Defendant.

Conclusion:

Just recently, President Donald J. Trump addressed the current State of the Union. In his remarks, President Trump asked Congress to pass legislation that finally delivers fairness and price transparency for American patients. He remarked that drug companies, insurance companies, and hospitals should disclose real prices to foster competition and bring costs down.

The Proposed Final Judgment does not promote or protect consumers sufficiently and does not correct the past harm inflicted on the State Health Plan and its over 720,000 members. We are opposed vehemently to anti-competitive policies and activities such as those employed by Defendant Atrium, and believe that strict compliance standards, full transparency, and payment of damages to the fullest extent possible are vital to promoting and protecting consumerism in the North Carolina health care market and to remedying past harm. We trust that you will take our feedback into consideration, and set aside the Proposed Final Judgment, or modify it as we have suggested.

Dale R. Folwell, CPA
North Carolina State Treasurer

Overview of This Information Collection

(1) Type of Information Collection: Reinstatement of the Supplemental Victimization Survey (SVS), without changes, a previously approved collection for which approval has expired.

(2) The Title of the Form/Collection: 2019 Supplemental Victimization Survey (SVS) to the National Crime Victimization Survey (NCVS).

(3) The agency form number, if any, and the applicable component of the Department sponsoring the collection: The form number for the questionnaire is SVS-1. The applicable component within the Department of Justice is the Bureau of Justice Statistics, in the Office of Justice Programs.

(4) Affected public who will be asked or required to respond, as well as a brief abstract: Respondents will be persons 16 years or older living in households located throughout the United States sampled for the National Crime Victimization Survey (NCVS). The SVS will be conducted as a supplement to the NCVS in all sample households for a six (6) month period from July through December 2019. The SVS is primarily an effort to measure the prevalence of stalking victimization among persons, the types of stalking victimization experienced, the characteristics of stalking victims, the nature and consequences of stalking victimization, and patterns of reporting to the police. BJS plans to publish this information in reports and reference it when responding to queries from the U.S. Congress, Executive Office of the President, the U.S. Supreme Court, state officials, international organizations, researchers, students, the media, and others interested in criminal justice statistics.

(5) An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond: An estimate of the total number of respondents is 119,526 persons age 16 or older. About 98.6% (117,879) will have no stalking victimization and will complete the SVS screener only with an average burden of three (3) minutes. Among the 1.4% of respondents (1,647) who experience stalking victimization, the time to ask the screener plus the detailed questions regarding the aspects of their stalking victimization is estimated to take an average of 18 minutes. Respondents will be asked to respond to this survey only once during the six month period from July through December 2019. The burden estimates are based on data from the prior administration of the SVS.

(6) An estimate of the total public burden (in hours) associated with the collection: There are an estimated 6,388 annual burden hours associated with this collection.
