

Public Process: EPA opened a 30-day public comment period that ended on November 29, 2018. One comment was received questioning the States authority to properly implement the enforcement provisions under the CWA. The comment was determined to be beyond the scope of the state's transfer of authority request. EPA provided response to the commenter and no change to the NDPDES program application was deemed necessary.

Authority: This action is taken under the authority of section 402 of the Clean Water Act as amended, 33 U.S.C. 1342. I hereby provide public notice of EPA's final action authorizing the State of North Dakota through the NDDEQ to administer the approval NDPDES program regulating discharges of pollutants to waters of the U.S. under its jurisdiction.

Dated: April 5, 2019.

Debra Thomas,

Acting Regional Administrator, EPA Region 8.

Abstract: As required by the Clean Air Act, EPA has regulations establishing emission standards and other requirements for various classes of vehicles, engines, and evaporative emission component. These regulations require that compliance be demonstrated prior to EPA granting a "Certificate of Conformity". EPA charges fees for administering this certification program. In 2004 the fees program was expanded to include nonroad categories of vehicles and engines, such as several categories of marine engines, locomotives, non-road recreational vehicles, and many nonroad compression-ignition and spark-ignition engines. Manufacturers and importers of covered vehicles, engines and components are required to pay the applicable certification fees prior to their certification applications being reviewed by the Agency. Under section 208 of the Clean Air Act (42 U.S.C. 7542(c)) all information, other than trade secret processes or methods, must be publicly available. Information about fee payments is treated as confidential information prior to certification.

Form Numbers: 3520-29.

Respondents/affected entities:

Manufacturers or importers of passenger cars, motorcycles, light trucks, heavy duty truck engines, nonroad vehicles or engines, and evaporative emissions components are required to receive a certificate of conformity from EPA prior to selling or introducing these products into commerce in the U.S.

Respondent's obligation to respond:

Required to obtain or retain a benefit (40 CFR part 1027).

Estimated number of respondents: 611 (total).

Frequency of response: An average of approximately eight responses per respondent per year.

Total estimated burden: 1,019 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$67,445 (per year), includes \$11,411 annualized capital or operation & maintenance costs.

Changes in Estimates: There is an increase of 92 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This increase is based on the increase in the number applications for certification and the associated fees, updates and corrections that are filed by the manufacturer as part of the fee payment process.

Dated: April 3, 2019.

Director, Compliance Division, Office of Transportation and Air Quality, Office of Air and Radiation.
