Abstract: In accordance with the regulations at 40 CFR part 79, subparts A, B, C, and D, Registration of Fuels and Fuel Additives, manufacturers (including importers) of motor-vehicle gasoline, motor-vehicle diesel fuel, and additives to those fuels, are required to have these products registered by EPA prior to their introduction into commerce. Registration involves providing a chemical description of the fuel or additive, and certain technical, marketing, and health-effects information. Manufacturers are also required to submit periodic reports (annually for additives, quarterly and annually for fuels) on production volume and related information. The information is used to identify products whose evaporative or combustion emissions may pose an unreasonable risk to public health, thus meriting further investigation and potential regulation. The information is also used to ensure that fuel additives comply with EPA requirements for protecting catalytic converters and other automotive emission controls. The data have been used to construct a comprehensive data base on fuel and additive composition. The Mine Safety and Health Administration of the Department of Labor restricts the use of diesel additives in underground coal mines to those registered by EPA. Most of the information has been claimed by the manufacturers as CBI.

Form Numbers: EPA Forms 3520-12, 3520-12A, 3520-12Q, 3520-13, 3520-13A, and 3520-13B.

Respondents/affected entities: Manufacturers and importers of motor-vehicle gasoline, motor-vehicle diesel fuel, and additives to those fuels.

Respondents obligation to respond: Mandatory per 40 CFR part 79.

Estimated number of respondents: 1,915.

Frequency of response: On occasion, quarterly, annually.

Total estimated burden: 22,550 hours per year. Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$2.3 million per year, includes \$53,500 annualized capital or operation & maintenance costs.

Changes in estimates: There is an increase of 1,550 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This increase is due to an increase in the number of registered fuels and fuel additives for which periodic reports are required.

Dated: April 5, 2019.

Director, Compliance Division, Office of Transportation and Air Quality, Office of Air and Radiation.
