

Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act, 16 U.S.C. 1801 *et seq.*). Recreational anglers and commercial hand-gear fishermen are required to report specific information regarding their catch of BFT.

Atlantic billfish and swordfish are managed internationally by ICCAT and nationally under ATCA and the Magnuson-Stevens Act. This collection provides information needed to monitor the recreational catch of Atlantic blue marlin, white marlin, and roundscale spearfish, which is applied to the recreational limit established by ICCAT, and the recreational catch of North Atlantic swordfish, which is applied to the U.S. quota established by ICCAT. This collection also provides information on recreational landings of West Atlantic sailfish, which is unavailable from other established monitoring programs.

II. Method of Collection

Respondents reporting BFT catch in states (and the United States Virgin Islands and Puerto Rico) other than Maryland and North Carolina may use either an internet website, smartphone app, or a toll-free telephone number. Respondents reporting Atlantic marlin, West Atlantic sailfish, or North Atlantic swordfish in states (and the United States Virgin Islands and Puerto Rico) other than Maryland or North Carolina may use either an internet website, smartphone app, or a toll-free telephone number to report landings information. In Maryland and North Carolina, a paper reporting system is used for all of the aforementioned species. Under state law, respondents in Maryland and North Carolina must submit a landing card at a state-operated reporting station. States that participate in an approved landing card program must submit weekly reports and one annual report to NOAA to summarize landings and results to date.
