

PFF ¶ 109. IPG again improperly imputed zero values to periods not covered by the data to achieve this result.³⁸

IPG failed to demonstrate the existence of any significant incidence of zero viewing. The Judges, therefore, need not evaluate whether the SDC have “demonstrate[d] the causes for the large amounts of zero viewing and explain[ed] in detail the effect of the zero viewing on the reliability of the results” of its methodology. *93–97 Librarian Order*, 66 FR at 66450.

8. Dr. Erdem Relied on Cable Data to Establish Viewership Correlation for Satellite Transmissions

IPG faulted Dr. Erdem for determining a correlation between local and distant ratings by using HHVH data that combined distant viewing by cable and satellite. According to IPG,

[Dr.] Erdem testified that the MPAA distant HHVH figures that he utilized were “an average” of distant cable and satellite HHVH Figures. No evidence or testimony exists as to why [Dr.] Erdem would blend the distant cable and satellite HHVH figures when attempting to calculate and impute a distant satellite rating.

IPG PFF ¶ 107 (citations omitted).

Dr. Erdem computed royalty shares based on local ratings. He used HHVH data to demonstrate that his reliance on local ratings was reasonable, by showing that there is a positive and statistically significant correlation between local ratings and distant viewing. Dr. Erdem testified that that stage of the analysis “is not specifically for cable or satellite.” 4/9/18 Tr. 108 (Erdem). In light of Dr. Erdem’s description of the particular, limited use of the HHVH data, and in the absence of any contrary evidence or expert analysis, the Judges find Dr. Erdem’s use of the HHVH data to be reasonable.

C. Conclusions Concerning the SDC Methodology

The Judges find and conclude that the SDC’s distribution methodology is facially adequate and an appropriate means in the current proceeding based on the record evidence for measuring relative market values of Devotional programming for the years at issue. IPG has presented no evidence or expert analysis that could serve as a basis for rejecting the SDC’s methodology or adjusting the SDC’s proposed royalty shares to account for any alleged shortcomings in that methodology. The Judges award royalty shares in the Devotional category as proposed by the SDC and detailed in Table 2.

VI. Conclusion

The Judges adopt the MPAA and SDC methodologies and proposed percentages for final distribution of satellite royalties deposited for the years 1999 through 2009 and cable royalties deposited for the years 2004–2009 and allocated to the Program Suppliers and Devotional categories, respectively. The Judges therefore ORDER distribution of funds in the Program Suppliers category as set forth in Table 1 and in the Devotional category as set forth in Table 2.

The Register of Copyrights may review the Judges’ Determination for legal error in resolving a material issue of substantive copyright law. The Librarian shall cause the Judges’ Determination, and any correction thereto by the Register, to be published in the **Federal Register** no later than the conclusion of the 60-day review period. When this Determination becomes final and non-appealable, either party may or the parties jointly may file a motion for distribution of the funds. The Judges will then order distribution in accordance with this Final Determination.
