The Agency is taking this action in response to a request for an extension to allow interested persons additional time to submit comments.

**SUPPLEMENTARY INFORMATION:** In the **Federal Register** of February 26, 2019, FDA published a proposed rule with a 90-day comment period to request comments on the Agency’s proposals relating to the regulation of OTC sunscreen monograph products. These proposals described the conditions under which the Agency proposes that OTC sunscreen monograph products are generally recognized as safe and effective and not misbranded. Comments on these proposals will inform FDA’s rulemaking to establish regulations putting into effect a final monograph for nonprescription, OTC sunscreen drug products. FDA also indicated in the proposed rule that the Agency would consider requests to defer further rulemaking with respect to specific sunscreen active ingredients to allow the submission of new safety and/or effectiveness data to the record if such requests were submitted to the docket within the initial 90-day comment period. Elsewhere in this issue of the **Federal Register**, the Agency is publishing a correction to the proposed rule to clarify illegible graphics of equations.

The Agency has received a request for a 60- to 90-day extension of the comment period for the proposed rule. This request conveyed concern that the current 90-day comment period does not allow sufficient time to develop a meaningful or thoughtful response to the proposed rule.

FDA has considered the request and is extending the comment period for the proposed rule for 30 days, until June 27, 2019. The Agency believes that a 30-day extension allows adequate time for interested persons to submit comments without significantly delaying rulemaking on these important issues. We note that this 30-day extension applies both to comments and to requests for the Agency to defer further rulemaking with respect to specific sunscreen active ingredients.
