*Needs and Uses:* The Commission received OMB approval for a revision to an existing information collection. OMB Collection No. 3060-1151, among other things, tracks the burdens associated with cable and telecommunications attachers gaining access to utility poles for pole attachments. In *Accelerating Wireline Broadband Deployment by Removing Barriers to Infrastructure Investment, Third Report and Order and Declaratory Ruling*, FCC 18-111, adopted a new framework for the vast majority of pole attachments governed by federal law by instituting a "one-touch make-ready" (OTMR) regime, in which a new attacher may elect to perform all simple work to prepare a pole for new wireline attachments in the communications space. This new framework includes safeguards to promote coordination among parties and ensures that new attachers perform the work safely and reliably. The Commission retained the existing multi-party pole attachment process for other new attachments that are complex or above the communications space of a pole, but made significant modifications to speed deployment, promote accurate billing, expand the use of self-help for new attachers when attachment deadlines are missed, and reduce the

likelihood of coordination failures that lead to unwarranted delays. The Commission further revised the pole attachment rules by codifying and redefining Commission precedent that requires utilities to allow attachers to "overlash" existing wires, thus maximizing the usable space on the pole. Utilities and pole attachers will use the information collected under this revision to 47 CFR 1.1411 to implement and coordinate both OTMR and non-OTMR pole attachments. Pole attachers will use the information collected under this revision to 47 CFR 1.1412 to select utility-approved contractors to perform pole attachment-related work, when required. Pole attachers and utilities will use the information collected under this revision to 47 CFR 1.1415 to inform utilities, when required, of an impending overlash of an attachment on a utility's pole and to coordinate inspection of a performed overlash.

## FEDERAL COMMUNICATIONS COMMISSION

### 47 CFR Part 73

[MB Docket No. 18-1268; RM-11800; DA 19-264]

### Television Broadcasting Services Bridgeport and Stamford, Connecticut

**AGENCY:** Federal Communications Commission.

**ACTION:** Final rule.

**SUMMARY:** At the request of Connecticut Public Broadcasting, Inc. (CPBI), licensee of television station WEDW channel \*49, Bridgeport, Connecticut (WEDW), the Commission has before it a contested *Notice of Proposed Rulemaking* to change WEDW's community of license from Bridgeport to Stamford, Connecticut. The Commission believes that the proposal is a preferential arrangement of allotments because it will provide Stamford, the third largest city in Connecticut, with its first broadcast television service. The Commission also reiterates that the grant of the proposal will not deprive Bridgeport of its sole broadcast television service because it will continue to be served by full power television station WZME, Bridgeport, Connecticut, licensed to NRJ TV NY License Co., LLC (NRJ).

**DATES:** Effective April 19, 2019.
