

Detailed Discussion of Public Comments: One commenter, a banking association, stated that the FR 2510 would be a necessary step toward narrowing the scope of the data collection from what the FSB originally proposed. In addition, the commenter made six recommendations to the Board:

- First, the commenter requested that the Board delay the implementation date in light of the following concerns:
 - Respondents will need time to revise their reporting systems and develop the required controls for a new report;
 - Several respondents rely on external vendors, who cannot begin software design work until the Board provides final approval and releases the final technical specifications;
 - Several respondents are undergoing transformative changes to their regulatory reporting systems, which will draw resources away from FR 2510 implementation; and
 - Respondents are currently preparing for the upcoming Comprehensive Capital Analysis and Review (CCAR),² which will also draw resources away from FR 2510 implementation.

For these reasons, the commenter recommended that the Board delay the proposed March 31, 2019, effective date to December 31, 2019, and that in no case should reporting begin earlier than September 30, 2019. The Board agrees with the commenter's recommendation to allow more time and is thus delaying the effective date of the FR 2510 to September 30, 2019. The Board believes the revised effective date addresses the commenter's concerns by providing institutions with sufficient time to prepare their reporting systems and implement appropriate controls.

Second, the commenter stated that there would be insufficient time to determine in each quarter the top 35 countries by total exposure as requested in Table 2, Consolidated Balance Sheet, since current quarter exposure data is based on the FFIEC 009, which has a filing deadline only five days before the FR 2510 for the first, second, and third calendar quarters. In response, the Board has clarified the instructions to specify that the top 35 countries by total exposure should be based on the four quarters preceding the current quarter.

Third, the commenter recommended that foreign exchange derivatives reported on the Financial Derivatives

and Foreign Exchange Derivatives Schedules should be defined consistently between Board regulatory reports and align with U.S. generally accepted accounting principles (GAAP). As proposed, the Financial Derivatives Schedule would have been populated automatically from the FR Y-15, which includes certain client clearing derivatives not included on the FR Y-9C or the FR 2436. In response, the Board has revised the instructions for the Financial Derivatives Schedule by removing the reference to automatic data population from the FR Y-15 and by aligning the schedule with U.S. GAAP and the FR Y-9C and FR 2436.

Fourth, the commenter noted a difference in treatment between the FR Y-9C and the FFIEC 009 for netting trading assets against trading liabilities in the same security (Committee on Uniform Security Identification Procedures (CUSIP) netting), which would affect production of data for the FR 2510. To address this concern, the commenter recommended revising the instructions to use the treatment of CUSIP netting on the FFIEC 009. The commenter also suggested clarifying the instructions so that the definition of country of residence for individuals would be consistent with the FFIEC 009. In response, the Board has revised the instructions to state that both the treatment of CUSIP netting and the definition of country of residence for individuals should be consistent with the FFIEC 009.

Fifth, the commenter requested that the Board provide clarifications to a supplemental instructional document that anchors the definitions of certain FR 2510 data items to the FR Y-9C and other reports and update the supplemental instructional document to reflect the current version of the FR Y-9C. The Board will provide the requested clarifications and update the supplemental instructional document in advance of the first FR 2510 filing date.

Sixth and finally, the commenter requested clarifications to the FR 2510 instructions for reporting of certificates of deposit held for trading; reverse repurchase agreements and securities lending agreements with household counterparts; master netting agreements; and short sale contracts. In response, the Board has clarified the instructions in these areas.

The other commenter, an individual, stated that the FR 2510 contains similarities to existing collections, such as the Central Bank Survey of Foreign Exchange and Derivatives Market Activity (FR 3036; OMB No. 7100-0285), the Treasury Department's Treasury International Capital (TIC) B

form for claims and liabilities by country and counterparty type (OMB No. 1505-0020), and the TIC D form for derivatives activity (OMB No. 1505-0199). While existing reports collect data on exposures and funding positions to different countries, it is important to note that the FR 2510 supports a more complete balance sheet analysis and collects more granular data regarding instruments, counterparty sector, currency, and residual maturity. Therefore, the Board has not altered the proposal in response to this comment.

Aside from the delayed implementation date and the instructional changes discussed above, the Board will implement the FR 2510 as originally proposed.
