

dimensions, identified by the OMB Statistical Policy Office in the 1993 "Resource Manual for Customer Surveys," are courtesy, competence, reliability, and communication. The survey also provides airmen with the opportunity to provide feedback on the services and a medical certificate application tool they use. This information is used to inform improvements in Aeromedical Certification Services. The survey was initially deployed in 2004, and deployed again in 2006, 2008, 2012, 2014, and 2016 (OMB Control No. 2120-0707). Across collections, minor revisions have been made to the survey items and response options to reflect changes in operational services and survey technology. In the current collection, format changes have been made to accommodate multiple administration modes (*i.e.*, paper, desktop computer, and mobile device), reduce the burden on the individual respondent, and potentially improve the response rate.

*Respondents:* 2,323 Airmen.

*Frequency:* Biannually.

*Estimated Average Burden per Response:* 10–15 minutes.

*Estimated Total Annual Burden:* 10–15 minutes per respondent, 581 total burden hours.
