Since the issuance of the proposed rule, we have received inquiries from a variety of stakeholders, including healthcare provider organizations and industry representatives requesting an extension to the comment period. In order to maximize the opportunity for the public to provide meaningful input to CMS, we believe that it is important to allow additional time for the public to prepare comments on the proposed rule. In addition, we believe that

granting an extension to the public comment period in this instance would further our overall objective to obtain public input on the proposed provisions to move the health care ecosystem in the direction of interoperability. Therefore, we are extending the comment period for the proposed rule for an additional 30 days.

While we believe it is in the best interest of the public and our proposed policies to extend the comment period for this proposed rule, we also acknowledge that stakeholders require appropriate implementation timelines that could be impacted by this extension. Therefore, we note that based on public comments received on this proposed rule, we will adjust the effective dates of our policies to allow for adequate implementation timelines as appropriate.

To date, we have received comments from organizations with broad stakeholder representation requesting that we extend the 60-day comment period for the proposed rule. For example, we have received comments requesting more time from clinicians, hospitals, health IT developers and developer associations, professional societies, researchers, quality improvement organizations, health plans, and patient advocacy organizations. The commenters have stated that due to the depth and complexity of the policies proposed, it is critical for the public to have extended time in providing sufficient and thoughtful comments to advance shared goals and shape the interoperability landscape.
