SUPPLEMENTARY INFORMATION:

A. Solicitation of Public Comment

Written comments and suggestions from the public should address one or more of the following four points:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

B. Purpose

Federal construction contractors may be required to submit schedules, in the

form of a progress chart, showing the order in which the Contractor proposes to perform the work. In accordance with FAR 52.236-15, Schedules for Construction Contracts, the Contractor shall, within five days after work commences on the contract or another period of time determined by the contracting officer, prepare and submit to the contracting officer for approval three copies of a practicable schedule showing the order in which the Contractor proposes to perform the work, and the dates on which the Contractor contemplates starting and completing the several salient features of the work (including acquiring materials, plants, and equipment).

This information is used to monitor progress under a Federal construction contract when other management approaches for ensuring adequate progress are not used. If the Contractor fails to submit a schedule within the time prescribed, the Contracting Officer may withhold approval of progress payments until the Contractor submits the required schedule.

A. Solicitation of Public Comment

Written comments and suggestions from the public should address one or more of the following four points:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

B. Purpose

FAR 16.205, Fixed-price contracts with prospective price redetermination, provides for firm fixed prices for an initial period of the contract and prospective redetermination of the price, at stated times during performance, during subsequent periods of performance. Prospective price redetermination is used in negotiated contracts when it is possible to establish a firm fixed price for an initial period, but not for subsequent periods of contract performance. FAR clause 52.216-5, Price Redetermination-Prospective, is included in these solicitations and contracts and requires a contractor to submit to the Government—

- Within an agreed upon timeframe, (1) proposed prices for the upcoming contract period, (2) a statement of costs incurred for the most recent period of performance, and (3) any supporting or relevant documentation; and,

- During periods where firm prices have not been established, a quarterly statement that includes a breakdown of total contract prices, costs, and profit incurred and all invoices accepted for delivered items or services for which final prices have not been established.

FAR 16.206, Fixed price contracts with retroactive price redetermination, provides for a fixed ceiling price, and retroactive price redetermination within the ceiling after completion of the contract. Retroactive price redetermination is used in research and development contracts valued at \$150,000 or less when a firm fixed price

cannot be negotiated and the contract amount and short performance period make the use of any other fixed-price contract type impracticable. FAR clause 52.216-6, Price Redetermination—Retroactive, is included in these solicitations and contracts and requires contractors to submit to the Government—

- Within an agreed upon timeframe after completion of the contract, (1) the proposed prices, (2) all costs incurred in performing the contract, and (3) any supporting or relevant documentation; and,

- Until final price redetermination has been completed, a quarterly statement that includes a breakdown of total contract prices, costs, and interim profit incurred and all invoices accepted for delivered items.

Contracting officers use the information submitted by respondents to accurately determine the price adjustments to be made under the contract or order in accordance with the clause.
