

Analyst for the PHIS Production Version of the export component (\$141,174).

- **Export Library Maintenance Cost:** The cost for funding two full-time employees to provide export library functions is \$337,369. Export library maintenance supports the PHIS export component and includes the writing, testing, and maintenance of complex business rules for evaluating the export application that is submitted into the PHIS export system. The business rules allow the system to determine product eligibility before the system accepts the application and transmits it to inspection program personnel. The business rules also facilitate the type of export certification required by the foreign government that will be issued when the application is accepted. This work supports the PHIS export component and is not part of current export library functions. In addition, there will be continuous updates to the system.

- **On-going Operations and Maintenance Costs:** As noted in the final export rule and September 2017 **Federal Register** notice, the cost of providing on-going operations and maintenance covers activities, such as modifying the application based on changes in requirements or user needs; adding functionality based on foreign regulatory changes; upkeep of the system to ensure a secure operating environment that protects the data, improvements and necessary repairs to keep the system responsive to users' needs; and costs to operate the system's components (FR 82 42056). The updated Operations and Maintenance costs is \$1,414,285.60, based on a fixed price contract for ongoing PHIS development, operations, and maintenance. This cost may increase in future years based on whether the Government Services Administration (GSA) schedule increases in labor rates and other factors.

- **eAuthentication costs:** Consistent with the final export rule and September 2017 **Federal Register** notice, the cost of providing eAuthentication will remain zero when FSIS begins assessing the fee June 1, 2019. eAuthentication is a single sign-on application that allows users to securely access multiple USDA applications, including the PHIS export component. To access the PHIS export component users need to register for a USDA eAuthentication account. To learn more about eAuthentication and how to register for an account, visit <https://www.eauth.usda.gov>.
