

Address comments to OMB Desk Officer for EPA.

EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

FOR FURTHER INFORMATION CONTACT:

Jesse Miller, Office of Resource Conservation and Recovery, Materials Recovery and Waste Management Division, MC 5302P, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460; telephone number: (703) 308-1180; fax number: (703) 308-0522; email address: miller.jesse@epa.gov.

SUPPLEMENTARY INFORMATION:

Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at www.regulations.gov or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202-566-1744. For additional information about EPA's public docket, visit <http://www.epa.gov/dockets>.

Abstract: EPA published the Non-Hazardous Secondary Materials (NHSM) Rule on March 21, 2011. This rule finalized standards and procedures to be used to identify whether non-hazardous secondary materials are solid wastes when used as fuels or ingredients in combustion units. "Secondary material" is defined as any material that is not the primary product of a manufacturing or commercial process, and can include post-consumer material, off-specification commercial chemical products or manufacturing chemical intermediates, post-industrial material, and scrap (codified in § 241.2). "Non-hazardous secondary material" is a secondary material that, when discarded, would not be identified as a hazardous waste under 40 CFR part 261 (codified in § 241.2). This RCRA solid waste definition determines whether a combustion unit is required to meet the emissions standards for solid waste incineration units issued under section 129 of the Clean Air Act (CAA) or the emissions standards for commercial, industrial, and institutional boilers issued under section 112 of the CAA. In this rule, EPA also finalized a definition of traditional fuels.

Amendments to this rule were published on February 7, 2013 (78 FR

9112), which added new materials to the list of categorical non-waste fuels. These amendments also provided clarification on certain issues on which EPA received new information, as well as specific targeted revisions. Further amendments to this rule were published on February 8, 2016 (81 FR 6688) and on February 7, 2018 (83 FR 5317), which added more materials to the list of categorical non-waste fuels.

Form Numbers: None.

Respondents/affected entities: Entities potentially affected by this action are Business or other for-profit.

Respondent's obligation to respond: Required to obtain benefit (Sections 1004 and 2002 of RCRA).

Estimated number of respondents: 1,656.

Frequency of response: One-time.

Total estimated burden: 868 hours per year. Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$72,295 (per year), includes \$1,539 in annualized capital or operation & maintenance costs.

Changes in the Estimates: There is a decrease of 2,368 hours in the total estimated respondent burden compared with the ICRs currently approved by OMB. This decrease is due to a decrease in the estimation of the number of certification statements, and to a decrease in the number of respondents needing to familiarize themselves with the requirements.

Courtney Kerwin,

Director, Regulatory Support Division.

Information Collection Request Submitted to OMB for Review and Approval; Comment Request; NESHAP for Primary Magnesium Refining (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) has submitted an information collection request (ICR), NESHAP for Primary Magnesium Refining (EPA ICR Number 2098.08, OMB Control Number 2060-0536) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork

Reduction Act. This is a proposed extension of the ICR, which is currently approved through June 30, 2019. Public comments were previously requested via the **Federal Register** on May 30, 2018 during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public. An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

DATES: Additional comments may be submitted on or before May 30, 2019.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA-HQ-OECA-2012-0699, to (1) EPA online using www.regulations.gov (our preferred method), by email to docket.oeca@epa.gov, or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460, and (2) OMB via email to oira_submission@omb.eop.gov. Address comments to OMB Desk Officer for EPA.

EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for the regulations published at 40 CFR part 63, subpart TTTTT were proposed on January 22, 2003, promulgated on October 10, 2003, and

amended on April 20, 2006. These regulations apply to existing and new facilities that perform primary magnesium refining where the total hazardous air pollutants (HAPs) emitted are greater than, or equal to, 10 tons per year for each HAP, or where the total HAPs emitted are greater than, or equal to, 25 tons per year of any combination of HAPs. New facilities include those that commenced construction or reconstruction after the date of proposal. This information is being collected to assure compliance with 40 CFR part 63, subpart TTTTTT.

In general, all NESHAP standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to NESHAP.

Form Numbers: None.

Respondents/affected entities: Primary magnesium refining facilities.

Respondent's obligation to respond: Mandatory (40 CFR part 63 Subpart TTTTTT).

Estimated number of respondents: 1 (total).

Frequency of response: Initially, occasionally, and semiannually.

Total estimated burden: 611 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$70,900 (per year), includes \$1,200 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is no change in the labor hours or O&M cost in this ICR compared to the previous ICR. This is due to two considerations. First, the regulations have not changed over the past three years and are not anticipated to change over the next three years. Secondly, the growth rate for the industry is very low, negative or non-existent, so there is no significant change in the overall burden.

Courtney Kerwin,

Director, Regulatory Support Division.

Abstract: The New Source Performance Standards (NSPS) for the regulations published at 40 CFR part 60, subpart K were proposed on June 11, 1973, and promulgated on March 8, 1974. These regulations apply to existing facilities and new facilities that store petroleum liquids in storage vessels with a storage capacity greater than 151,416 liters (40,000 gallons), including: Storage vessels with capacity greater than 151,416 liters (40,000 gallons), but not exceeding 246,052 liters (65,000 gallons). New facilities include those that commenced construction, modification after the date of proposal. This information is being collected to assure compliance with 40 CFR part 60, subpart K.

In general, all NSPS standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to NSPS.

Form Numbers: None.

Respondents/affected entities: Refineries.

Respondent's obligation to respond: Mandatory.

Estimated number of respondents: 69 (total).

Frequency of response: Initially and occasionally.

Total estimated burden: 321 hours (per year). Burden is defined at 5 CFR 1320.3(b).
