Abstract: EPA published the Non-Hazardous Secondary Materials (NHSM) Rule on March 21, 2011. This rule finalized standards and procedures to be used to identify whether non-hazardous secondary materials are solid wastes when used as fuels or ingredients in combustion units. "Secondary material" is defined as any material that is not the primary product of a manufacturing or commercial process, and can include post-consumer material, off-specification commercial chemical products or manufacturing chemical intermediates, post-industrial material, and scrap (codified in § 241.2). "Non-hazardous secondary material" is a secondary material that, when discarded, would not be identified as a hazardous waste under 40 CFR part 261 (codified in § 241.2). This RCRA solid waste definition determines whether a combustion unit is required to meet the emissions standards for solid waste incineration units issued under section 129 of the Clean Air Act (CAA) or the emissions standards for commercial, industrial, and institutional boilers issued under section 112 of the CAA. In this rule, EPA also finalized a definition of traditional fuels.

Amendments to this rule were published on February 7, 2013 (78 FR

9112), which added new materials to the list of categorical non-waste fuels. These amendments also provided clarification on certain issues on which EPA received new information, as well as specific targeted revisions. Further amendments to this rule were published on February 8, 2016 (81 FR 6688) and on February 7, 2018 (83 FR 5317), which added more materials to the list of categorical non-waste fuels.

Form Numbers: None.

Respondents/affected entities: Entities potentially affected by this action are Business or other for-profit.

Respondent's obligation to respond: Required to obtain benefit (Sections 1004 and 2002 of RCRA).

Estimated number of respondents: 1,656.

Frequency of response: One-time.

Total estimated burden: 868 hours per year. Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$72,295 (per year), includes \$1,539 in annualized capital or operation & maintenance costs.

Changes in the Estimates: There is a decrease of 2,368 hours in the total estimated respondent burden compared with the ICRs currently approved by OMB. This decrease is due to a decrease in the estimation of the number of certification statements, and to a decrease in the number of respondents needing to familiarize themselves with the requirements.

Director, Regulatory Support Division.
