

Scheduling Entity with the Electric Reliability Council of Texas (ERCOT) and that it is registered with the Public Utility Commission of Texas as a wholesale power marketer. LUME is also conditionally authorized to sell wholesale electric energy, capacity, and ancillary services outside of ERCOT at market-based rates pursuant to authority granted by the Federal Energy Regulatory Commission (FERC).

In its application, the Applicant states that it “does not own any electric generation, transmission facilities, or distribution facilities and does not hold a franchise or service territory or native load obligation.” The electric energy that the Applicant proposes to export to Mexico over international electric transmission facilities would be surplus energy acquired from U.S. generating sources. The existing international transmission facilities to be utilized by the Applicant have previously been authorized by Presidential permits issued pursuant to Executive Order 10485, as amended, and are appropriate for open access transmission by third parties.

Procedural Matters: Any person desiring to be heard in this proceeding should file a comment or protest to the application at the address provided above. Protests should be filed in accordance with Rule 211 of the Federal Energy Regulatory Commission’s (FERC) Rules of Practice and Procedure (18 CFR 385.211). Any person desiring to become a party to this proceeding should file a motion to intervene at the above address in accordance with FERC Rule 214 (18 CFR 385.214). Five (5) copies of such comments, protests, or motions to intervene should be sent to the address provided above on or before the date listed above.

Comments and other filings concerning LUME’s application to export electric energy to Mexico should be clearly marked with OE Docket No. EA-471. An additional copy is to be provided directly to both Jessica H. Miller, Vistra Energy, 1005 Congress Avenue, Suite 750, Austin, Texas 78701, and Tracey L. Bradley, Bracewell LLP, 2001 M Street NW, Suite 900, Washington, DC 20036.

A final decision will be made on this application after the environmental impacts have been evaluated pursuant to DOE’s National Environmental Policy Act Implementing Procedures (10 CFR part 1021) and after DOE determines that the proposed action will not have an adverse impact on the sufficiency of supply or reliability of the U.S. electric power supply system.

Copies of this application will be made available, upon request, for public

inspection and copying at the address provided above, by accessing the program website at <http://energy.gov/node/11845>, or by emailing Angela Troy at Angela.Troy@hq.doe.gov.
