FEDERAL COMMUNICATIONS COMMISSION

47 CFR Parts 2, 25, and 30

[GN Docket No. 14-177; FCC 19-30]

Use of Spectrum Bands Above 24 GHz for Mobile Radio Services

AGENCY: Federal Communications Commission.
ACTION: Final rule.

SUMMARY: In this document, the Federal Communications Commission (Commission or FCC) adopts rules for specific millimeter wave bands above 24 GHz in the *Fifth Report and Order*. The Commission takes two actions that continue its efforts to make available millimeter wave (mmW) spectrum, at or above 24 GHz, for fifth-generation (5G) wireless, Internet of Things, and other advanced spectrum-based services, including satellite broadband services. First, the Commission establishes rules to allow Fixed-Satellite Service (FSS) operators such as satellite broadband service operators, to operate with individually licensed earth stations transmitting in the 50.4–51.4 GHz band using criteria identical to those applicable in the 24.75–25.25 GHz band. Second, the Commission establishes a process for the Department of Defense (Department) to operate on a shared basis in the Upper 37 GHz band (37.6–38.6 GHz band) in limited circumstances.

DATES: Effective June 12, 2019.

Final Regulatory Flexibility Analysis

The Regulatory Flexibility Act (RFA) requires that an agency prepare a regulatory flexibility analysis for notice and comment rulemakings, unless the agency certifies that “the rule will not, if promulgated, have a significant economic impact on a substantial number of small entities.” Accordingly, the Commission has prepared a Final Regulatory Flexibility Analysis (FRFA) concerning the possible impact of the rule changes contained in this *Fifth Report and Order* on small entities.
