Endangered Species; File No. 21367

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; receipt of application for a permit modification.

SUMMARY: Notice is hereby given that Christopher Marshall, Ph.D., Texas A&M University at Galveston, 200 Seawolf Parkway, Galveston, TX 77553, has requested a modification to scientific research Permit No. 21367.

DATES: Written, telefaxed, or email comments must be received on or before June 20, 2019.

ADDRESSES: The modification request and related documents are available for review by selecting "Records Open for Public Comment" from the Features box on the Applications and Permits for Protected Species (APPS) home page, <https://apps.nmfs.noaa.gov>, and then selecting File No. 21367 Mod 3 from the list of available applications. These documents are also available upon written request or by appointment in the Permits and Conservation Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Room 13705, Silver Spring, MD 20910; phone: (301) 427-8401; fax: (301) 713-0376.

Written comments on this application should be submitted to the Chief, Permits and Conservation Division, at the address listed above. Comments may also be submitted by facsimile to (301) 713-0376, or by email to NMFS.Pr1Comments@noaa.gov. Please include the File No. in the subject line of the email comment.

Those individuals requesting a public hearing should submit a written request

to the Chief, Permits and Conservation Division at the address listed above. The request should set forth the specific reasons why a hearing on this application would be appropriate.

FOR FURTHER INFORMATION CONTACT: Amy Hapeman or Erin Markin, (301) 427-8401.

SUPPLEMENTARY INFORMATION: The subject modification to Permit No. 21367, issued on March 15, 2018 (83 FR 17655) is requested under the authority of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*) and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR parts 222-226).

Permit No. 21367 authorizes the permit holder to conduct research on sea turtles to characterize the movement, habitat use, foraging ecology, and health of sea turtles on the Texas coast and in the western Gulf of Mexico. Researchers are authorized to capture sea turtles by hand, dip net, tangle net or cast net and perform the following procedures prior to release of animals: Examination, marking, morphometrics, biological sampling, and attachment of transmitters. The permit holder requests authorization to increase the number of green sea turtles (*Chelonia mydas*) that may be taken annually from 45 to 80 animals to accommodate increased efforts in Laguna Madre. No other changes to the permit are requested.

Dated: May 16, 2019.

Julia Marie Harrison,

Chief, Permits and Conservation Division, Office of Protected Resources, National Marine Fisheries Service.

RIN 0648-BI08

Atlantic Highly Migratory Species; Amendment 13 to the 2006 Consolidated Atlantic Highly Migratory Species Fishery Management Plan

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of intent (NOI) to prepare an environmental impact analysis; notice of availability of issues and options paper; request for comments.

SUMMARY: NMFS announces its intent to prepare an environmental impact

analysis under the National Environmental Policy Act (NEPA), and the availability of the Issues and Options Paper for Amendment 13 to the 2006 Consolidated Highly Migratory Species (HMS) Fishery Management Plan (FMP) (Issues and Options Paper). This notice announces the start of a public process for determining the scope of significant issues related to the management of Atlantic bluefin tuna (bluefin), and addressing issues identified by considering modification of bluefin regulations. The catalysts for beginning this regulatory process are the release of the Draft Three-Year Review of the IBQ Program (Three-Year Review), recent changes in the bluefin fishery, and advice and input from the HMS Advisory Panel and the public.

The environmental impact analysis will include an assessment of the potential effects of alternative measures for management of bluefin under the 2006 Consolidated Atlantic Highly Migratory Species Fishery Management Plan (2006 Consolidated HMS FMP). The subjects in the Issues and Options Paper include refining the Individual Bluefin Quota (IBQ) Program, reassessing allocation of the bluefin quota and subquota, including the potential elimination or phasing out of the Purse Seine category, and other regulatory provisions regarding directed fisheries and incidental pelagic longline fisheries. The scoping process and environmental impact analysis would determine whether existing management measures are the best means of achieving current management objectives and providing flexibility to adapt to variability in the future, consistent with the 2006 Consolidated HMS FMP, the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act), the Atlantic Tunas Convention Act (ATCA), and other relevant Federal laws. NMFS will use the scoping process and the draft environmental impact analysis to consider development of Amendment 13 to the 2006 Consolidated HMS FMP, if warranted.

NMFS is requesting comments on this NOI and the management options described in the Issues and Options Paper, and other potential regulatory provisions regarding the bluefin directed fisheries and incidental pelagic longline fishery that would meet the purpose and need for this action. NMFS will hold public scoping meetings and a webinar to gather comment on these measures and potential management options. The time and location details of the scoping meetings and webinar will be announced in a separate **Federal Register** notice. NMFS will also present
