Abstract: The New Source Performance Standards (NSPS) for Ammonium Sulfate Manufacturing Plants (40 CFR part 60, subpart PP) were proposed on February 4, 1980, promulgated on November 12, 1980, and amended on October 17, 2000. These regulations apply to ammonium sulfate dryers located at both existing and new ammonium sulfate manufacturing plants in the caprolactam by-product, synthetic, and coke oven by-products sectors of the ammonium sulfate manufacturing industry. New facilities include those that commenced construction, modification or reconstruction after the date of proposal. This information is being collected to assure compliance with 40 CFR part 60, subpart PP.

In general, all NSPS standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to NSPS.

Form numbers: None.

Respondents/affected entities: Ammonium sulfate manufacturing facilities.

Respondent's obligation to respond: Mandatory (40 CFR part 60 Subpart PP).

Estimated number of respondents: 2 (total).

Frequency of response: Initially and semiannually.

Total estimated burden: 286 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$32,600 (per year), which includes \$0 for both annualized capital/startup and operation & maintenance costs.

Changes in the estimates: There is no change in the total estimated burden compared with the ICR currently approved by OMB. The regulations have not changed over the past three years and are not anticipated to change over the next three years; therefore, the growth rate for the industry is non-existent. This ICR reflects the on-going burden and costs for two existing facilities.

Courtney Kerwin,

Director, Regulation Support Division.
