SUPPLEMENTARY INFORMATION:

Background

The FMCSA has been tasked with ensuring that commercial vehicles entering the United States (U.S.) and travelling on U.S. Highways are operating safely and within current U.S. standards. To achieve this mission and ensure safety on public highways, FMCSA must inspect commercial and bus traffic at points of destination or origin, the U.S.-Mexico Border being a main point of origin.

FMCSA inspectors currently inspect both bus and commercial truck traffic at multiple LPOEs along the U.S.-Mexico Border in both California and Arizona at facilities that were not built for their needs and at sites which do not allow for thorough, safe inspection of vehicles. In April of 2018, FMCSA received funding from the Committees of Congress to develop, design, and construct facilities that will allow them to meet their mission goals safely and effectively.

It has been determined that to achieve this mission, six (6) inspection facilities will be needed at five (5) different LPOEs in both California and Arizona:

- San Ysidro, CA (Bus Inspection)
- Otay Mesa, CA (Commercial Truck Inspection)
- Calexico East, CA (Bus and Commercial Truck Inspection)
- San Luis II, AZ (Commercial Truck Inspection)
- Nogales Mariposa, AZ (Commercial Truck Inspection)

Alternatives

The EIS will consider three Alternatives; a “preferred build alternative” for six (6) facilities at five (5) locations, a “smaller footprint” build alternative for six (6) facilities at the same five (5) locations, and a “no

action” alternative. The alternatives for each location are described below:

San Ysidro LPOE, CA

The construction of a new bus inspection facility on a newly acquired federal site north of the LPOE. The proposed facility includes an existing single-story building and parking lot. Site work would require the clearing of the existing site and building, extension/relocation of existing utilities for electrical, sanitary sewer and water, paving of the bus path and realignment and partial paving of the parking lot and entry and exit access through the site. Facility construction would include an inspection canopy with pits and a “Basic” FMCSA administration building. The other build alternative would consist of a smaller facility footprint on the same location.

Otay Mesa LPOE, CA

The proposed truck inspection facility would be located to the east of the current and proposed Port of Entry, on a site currently owned and operated by the California Department of Transportation. The proposed site is linked to the Port of Entry by a frontage road that is already in place. Site work would require the clearing of the existing site, extension of existing utilities for electrical, sanitary sewer and water. Facility construction would include an inspection canopy with a pit and a “Basic” FMCSA administration building. The other build alternative would consist of a smaller facility footprint on the same location.

Calexico East LPOE, CA

The proposed truck inspection facility would be located beyond the northern edge of the LPOE property line, adjacent to California State Highway Patrol land and is accessed at the exit of the LPOE. Site work would require the clearing of the existing site, extension of existing utilities for electrical, sanitary sewer and water, and paving of the truck path. Facility construction would include an inspection canopy with pits and a “Medium 1” FMCSA administration building. The other build alternative would consist of a smaller facility footprint on the same location.

The proposed bus facility would be located on the northwestern edge of the LPOE property. Site work would require the extension of existing utilities for electrical, sanitary sewer and water, and paving of the bus path through the site. Facility construction would include an inspection canopy with pits and a “Basic” FMCSA administration building. The other build alternative

would consist of a smaller facility footprint on the same location.

San Luis II LPOE, AZ

The proposed truck inspection facility would be located on the northern edge of the LPOE property line. A portion of the site work would be constructed on newly acquired Federal land that will allow access from the site after hours. Site work would require the clearing of the existing site, extension of existing utilities for electrical, sanitary sewer and water, paving of the truck path, and relocating the existing CBP impound lot. Facility construction would include an inspection canopy with pits and a "Medium 1" FMCSA administration building. The other build alternative would consist of a smaller facility footprint on the same location.

Nogales Mariposa LPOE, AZ

The proposed truck inspection facility would be located on privately owned land, north of the existing LPOE. Site work would require the clearing of the existing site, extension of existing utilities for electrical, sanitary sewer and water, paving of the truck path. Facility construction would include an inspection canopy with pits and a FMCSA administration building. The other build alternative would consist of a smaller facility footprint on the same location.

The "no action" alternative assumes that no new facility would be constructed at any of the sites and the LPOEs and FMCSA operations would continue to operate under current conditions.
