DEPARTMENT OF JUSTICE

Antitrust Division

Notice is hereby given that, on April 30, 2019, pursuant to Section 6(a) of the National Cooperative Research and Production Act of 1993, 15 U.S.C. 4301 et seq. (“the Act”), Southwest Research Institute—Cooperative Research Group on Energy Storage System Evaluation and Safety II (“EssEs-II”) has filed written notifications simultaneously with the Attorney General and the Federal Trade Commission disclosing changes in its membership. The notifications were filed for the purpose of extending the Act’s provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances. Specifically, ANSYS, Inc., Canonsburg, PA; and KOMATSU America Corp., Peoria, IL, have been added as parties to this venture.

No other changes have been made in either the membership or planned activity of the group research project. Membership in this group research project remains open, and EssEs-II intends to file additional written notifications disclosing all changes in membership.

On September 21, 2016, EssEs-II filed its original notification pursuant to Section 6(a) of the Act. The Department of Justice published a notice in the Federal Register pursuant to Section 6(b) of the Act on November 15, 2016 (81 FR 80087).

The last notification was filed with the Department on February 11, 2019. A notice was published in the Federal Register pursuant to Section 6(b) of the Act on February 28, 2019 (84 FR 6822).

Nora Kincaid, BLS Clearance Officer, at (202) 691–7628. (See SUPPLEMENTARY INFORMATION:)

DEPARTMENT OF LABOR

Bureau of Labor Statistics

Information Collection Activities; Comment Request

AGENCY: Bureau of Labor Statistics, Department of Labor.

ACTION: Notice of information collection; request for comment.

SUMMARY: The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden, conducts a pre-clearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the Paperwork Reduction Act of 1995. This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed. The Bureau of Labor Statistics (BLS) is soliciting comments concerning the proposed extension of the “Census of Fatal Occupational Injuries.” A copy of the proposed information collection request (ICR) can be obtained by contacting the individual listed below in the ADDRESSES section of this notice.

DATES: Written comments must be submitted to the office listed in the ADDRESSES section of this notice on or before July 29, 2019.

ADDRESSES: Send comments to Nora Kincaid, BLS Clearance Officer, Division of Management Systems, Bureau of Labor Statistics, Room 4080, 2 Massachusetts Avenue NE, Washington, DC 20212. Written comments also may be transmitted by fax to (202) 691–5111 (this is not a toll free number).

FOR FURTHER INFORMATION CONTACT: Nora Kincaid, BLS Clearance Officer, at (202)691–7628. (See ADDRESSES section.)

SUPPLEMENTARY INFORMATION:

I. Background

The Bureau of Labor Statistics (BLS) was delegated responsibility by the Secretary of Labor for implementing Section 24(a) of the Occupational Safety and Health Act of 1970. This section states that “the Secretary shall compile accurate statistics on work injuries and illnesses which shall include all disabling, serious, or significant injuries and illnesses . . .”

Prior to the implementation of the Census of Fatal Occupational Injuries (CFOI), the BLS generated estimates of occupational fatalities for private sector employers from a sample survey of about 280,000 establishments. Studies showed that occupational fatalities were underreported in those estimates as well as in those compiled by regulatory, vital statistics and workers’ compensation systems. Estimates prior to the CFOI varied widely, ranging from 3,000 to 10,000 fatal work injuries annually. In addition, information needed to develop prevention strategies were often missing from these earlier programs.

In the late 1980s, the National Academy of Sciences study, Counting Injuries and Illnesses in the Workplace, and another report, Keystone National Policy Dialogue on Work-Related Illness and Injury Recordkeeping, emphasized the need for the BLS to compile a complete roster of work-related fatalities because of concern over the accuracy of using a sample survey to estimate the incidence of occupational fatalities. These studies also recommended the use of all available data sources to compile detailed information for fatality prevention efforts.

The BLS tested the feasibility of collecting fatality data in this manner in 1989 and 1990. The resulting CFOI was implemented in 32 States in 1991. National data covering all 50 States, New York City, and the District of Columbia have been compiled and published annually for years 1992 through 2014, approximately eight months after the end of each calendar year, with final data being published 16 months after the end of each calendar year. Since 2015, CFOI has moved to a single release of final data, 12 months after the end of each calendar year. The CFOI compiles comprehensive, accurate, and timely information on work-injury fatalities needed to develop effective prevention strategies. The system collects information concerning the incident, the demographic information of the deceased, and the characteristics of the employer.

Data are used to:

• Develop employee safety training programs.
• Develop and assess the effectiveness of safety standards.
• Conduct research for developing prevention strategies.

In addition, State partners use the data to publish State reports, to identify State-specific hazards, to allocate resources for promoting safety in the workplace, and to evaluate the quality of work life in the State.

II. Current Action

Office of Management and Budget clearance is being sought for the Census of Fatal Occupational Injuries. In 2017, 5,147 workers lost their lives as a result of injuries received on the job. This official systematic, verifiable count mutes controversy over the various counts from different sources. The CFOI count has been adopted by the National Safety Council and other organizations as the sole source of a comprehensive count of fatal work injuries.
injuries for the U.S. If this information were not collected, the confusion over the number and patterns in fatal occupational injuries would hamper prevention efforts. By providing timely occupational fatality data, the CFOI provides safety and health managers the information necessary to respond to emerging workplace hazards.

During 2018, BLS national office responded to over 400 requests for CFOI data from various organizations. (This figure excludes requests received by the States for State-specific data.) In addition, the CFOI page of the BLS website averaged about 11,300 users per month in 2017.

National office staff also responded to numerous requests from safety organizations for staff members to participate in safety conferences and seminars. The CFOI research file, made available to safety and health groups, is being used by 14 organizations. Study topics include fatalities by worker demographic category (young workers, older workers, Hispanic workers); by occupation or industry (construction workers, police officers, firefighters, landscaping workers, workers in oil and gas extraction); by event (heat-related fatalities, fatalities from workplace violence, suicides, falls from ladders); or other research such as safety and health program effectiveness and the impact of fatality risk on wages. A current list of research articles and reports that include CFOI data can be found here: http://www.bls.gov/iif/publications.htm.

III. Desired Focus of Comments

The Bureau of Labor Statistics is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility.
- Evaluate the accuracy of the agency’s estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used.

- Enhance the quality, utility, and clarity of the information to be collected.
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

Title of Collection: Census of Fatal Occupational Injuries.

OMB Number: 1220–0133.

Type of Review: Extension of a currently approved collection.

Affected Public: Federal government; Individuals or households; Private sector (Business or other for-profits, Not-for-profit institutions, Farms); State, local, or tribal governments.

Frequency: On occasion.

DEPARTMENT OF LABOR

Mine Safety and Health Administration

Brookwood-Sago Mine Safety Grants

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Funding Opportunity Announcement (FOA); extension of closing date for applications.

Announcement Type: New

Funding Opportunity Number: FOA BS–2019–1

Catalog of Federal Domestic Assistance (CFDA) Number: 17.603

SUMMARY: On March 25, 2019, MSHA published a Funding Opportunity Announcement (FOA) that provides grant funds for education and training programs to help identify, avoid, and prevent unsafe working conditions in and around mines. The notice announced the closing date for applications was 60 days after the FOA was published on March 25, 2019. MSHA is extending the closing date to June 28, 2019.

DATES: The closing date for applications will be June 28, 2019, (no later than 11:59 p.m. EDT). MSHA will award grants on or before September 30, 2019.

ADDRESSES: Grant applications for this opportunity must be submitted electronically through the Grants.gov site at www.grants.gov. If applying online poses a hardship to any applicant, the MSHA Directorate of Educational Policy and Development will provide.

FOR FURTHER INFORMATION CONTACT: For further information, questions regarding this FOA BS–2019–1 should be directed to Janice Dates at oates.janice@dol.gov or 202–693–9573 (this is not a toll-free number) or Cindy Hennigan at hennigan.cindy@dol.gov or 202–693–9570 (this is not a toll-free number).

SUPPLEMENTARY INFORMATION: On March 25, 2019, MSHA published a notice announcing that the Agency is providing up to $400,000 for the 2019 Brookwood-Sago grant program (84 FR 11127). The focus of these grants will be training programs and training materials on powered haulage safety (i.e., reducing vehicle-on-vehicle collisions, increasing seat belt use, and improving belt conveyor safety), examinations of working places at metal and nonmetal mines, mine emergency prevention and preparedness, or other programs to prevent unsafe conditions in and around mines. The FOA published on March 25, 2019, provides the background information and the requirements for the projects funded under the solicitation.

David G. Zatezalo,
Assistant Secretary of Labor for Mine Safety and Health.
