SUPPLEMENTARY INFORMATION: This ICR seeks approval under the PRA to reinstate the Current Population Survey (CPS) Disability Supplement information collection without change from when it was most recently approved. The Disability Supplement will provide information on labor force participation rates for people with disabilities; the use of and satisfaction with programs that prepare people with disabilities for employment; the work history, barriers to employment, and workplace accommodations reported by persons with a disability; and the effect of financial assistance programs on the likelihood of working. Because the Disability Supplement is part of the CPS, the same detailed demographic information collected in the CPS will be available about respondents to the supplement. The BLS Authorizing Statute authorizes this information collection. See 29 U.S.C. 1. 2.

This proposed information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information if the collection of information does not display a valid Control Number. See 5 CFR 1320.5(a) and 1320.6. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on December 26, 2018 (83 FR 66310).

Interested parties are encouraged to send comments to the OMB, Office of Information and Regulatory Affairs at the address shown in the **ADDRESSES** section within thirty (30) days of publication of this notice in the **Federal Register**. In order to help ensure appropriate consideration, comments should mention OMB Control Number 1220-0186. The OMB is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

SUPPLEMENTARY INFORMATION:

I. Background

The ATUS is the Nation's first federally administered, continuous survey on time use in the United States. It measures, for example, time spent with children, working, sleeping, or doing leisure activities. In the United States, several existing Federal surveys collect income and wage data for individuals and families, and analysts often use such measures of material prosperity as proxies for quality of life. Time-use data substantially augment these quality-of-life measures. The data also can be used in conjunction with wage data to evaluate the contribution of non-market work to national economies. This enables comparisons of production between nations that have different mixes of market and non-market activities.

The ATUS develops nationally representative estimates of how people spend their time. Respondents also report who was with them during activities, where they were, how long each activity lasted, and if they were paid. All of this information has numerous practical applications for sociologists, economists, educators, government policymakers, businesspersons, health researchers, and others, answering questions such as:

- Do the ways people use their time vary across demographic and labor force characteristics, such as age, sex, race, ethnicity, employment status, earnings, and education?
- How much time do parents spend in the company of their children, either actively providing care or being with them while socializing, relaxing, or doing other things? How has this changed over time?
- How are earnings related to leisure time—do those with higher earnings spend more or less time relaxing and socializing?
- How much time do people spend working at their workplaces and in their homes?

The ATUS data are collected on an ongoing basis nearly every day of the year, allowing analysts to identify changes in how people spend their time.

II. Current Action

Office of Management and Budget clearance is being sought for the American Time Use Survey. This survey collects information on how individuals in the United States use their time. Collection is done on a continuous basis with the sample drawn monthly. The survey sample is drawn from
