Office of Management and Budget.

Dated: May 23, 2019.

Dawn D. Wolfgang,
NCUA PRA Clearance Officer.

AGENCY: National Credit Union Administration.

SUMMARY: The National Credit Union Administration (NCUA) is announcing plans to renew this collection in accordance with the requirements of the Paperwork Reduction Act of 1995, we are providing opportunity for public comment on this action. After obtaining and considering public comment, NCUA will prepare the submission requesting Office of Management and Budget (OMB) clearance of this collection for no longer than 3 years.

DATES: Written comments on this notice must be received by July 29, 2019 to be assured consideration. Comments received after that date will be considered to the extent practicable.

FOR FURTHER INFORMATION CONTACT:
Deborah Brown, Office of Management and Budget, National Credit Union Administration, 1775 Duke Street, Alexandria, VA 22314. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339, which is accessible 24 hours a day, 7 days a week, including Federal holidays.

SUPPLEMENTARY INFORMATION:
The primary purpose of this revision is to update the PAPPG to incorporate a number of policy-related changes and clarifications of language. The draft NSF PAPPG is now available for your review and consideration on the NSF website at http://www.nsf.gov/bfa/dias/policy/. To facilitate review, revised text has been highlighted in yellow throughout the document to identify significant changes. A brief comment explanation of the change also is provided.

Proposed Project: The National Science Foundation Act of 1950 (Pub. L. 81–507) sets forth NSF’s mission and purpose:

“To promote the progress of science; to advance the national health, prosperity, and welfare; to secure the national defense. . .”

The Act authorized and directed NSF to initiate and support:
• Basic scientific research and research fundamental to the engineering process;
• Programs to strengthen scientific and engineering research potential;
• Science and engineering education programs at all levels and in all the various fields of science and engineering;
• Programs that provide a source of information for policy formulation; and
• Other activities to promote these ends.

NSF’s core purpose resonates clearly in everything it does: Promoting achievement and progress in science and engineering and enhancing the potential for research and education to contribute to the Nation. While NSF’s vision of the future and the mechanisms it uses to carry out its charges have evolved significantly over the last six decades, its ultimate mission remains the same.

Use of the Information: The regular submission of proposals to the Foundation is part of the collection of information and is used to help NSF fulfill this responsibility by initiating and supporting merit-selected research and education projects in all the scientific and engineering disciplines. NSF receives more than 50,000 proposals annually for new projects, and makes approximately 11,000 new awards.

Support is made primarily through grants, contracts, and other agreements awarded to approximately 2,000 colleges, universities, academic consortia, nonprofit institutions, and small businesses. The awards are based mainly on merit evaluations of proposals submitted to the Foundation. The Foundation has a continuing commitment to monitor the operations of its information collection to identify and address excessive reporting burdens as well as to identify any real or apparent inequities based on gender, race, ethnicity, or disability of the proposed principal investigator(s)/project director(s) or the co-principal investigator(s)/co-project director(s).

Burdens on the Public: The Foundation estimates that an average of 120 hours is expended for each proposal submitted. An estimated 50,000 proposals are expected during the course of one year for a total of 6,000,000 public burden hours annually.

Comments: Comments are invited on (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information shall have practical utility; (b) the accuracy of the Agency’s estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information on respondents, including through the use of automated collection techniques or other forms of information technology; and (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Dated: May 23, 2019.

Suzanne H. Plimpton,
Reports Clearance Officer, Office of Management and Budget.

For paper comments, send to: Michael H. Donnelly, Reports Clearance Officer, Office of Management and Budget, 411 C Street NW, Room 3516, Washington, DC 20503.

For comments by e-mail, send to: splimpto@nsf.gov.

This collection is estimated to take 1 hour to complete, if any, and is estimated to be completed by approximately 50,000 respondents, for a total of 6,000,000 burden hours annually.
