

Authorities (BAs), list the Commission on the “CC” list of e-Tags so that the Commission can receive a copy of the e-Tags (the “ ‘CC’ list requirement”). The Commission accesses the e-Tags by contracting with a commercial vendor, OATI, that collects all e-Tags on which FERC is identified as a “CC” list recipient in a secure database to which FERC staff has access.

In early 2014, the North American Energy Standards Board (NAESB) incorporated the “CC” list requirement on e-Tags as part of the tagging process.³ Even before NAESB added the FERC requirement to the tagging standards, the “CC” list requirement, with exemptions for e-Tags between non-U.S. BAs that do not go through any U.S. BAs, had already been programmed into

the industry standard tagging software so as to make the inclusion of FERC in the “CC” list of any new e-Tag automatic, where appropriate.

The Commission expects that PSEs and BAs will continue to use existing, automated procedures to create and validate the e-Tags in a way that automatically provides the Commission with access to them. In the rare event that a newly formed, non-U.S. BA would need to alert e-Tag administrators that certain tags it generates qualify for exemption under the Commission’s regulations (e.g., transmissions from a new non-U.S. BA into another non-U.S. BA using a path that does not go through a U.S. BA), this administrative function would be expected to require less than an hour of effort total from

both the BA and an e-Tag administrator to include the BA on the exemption list. New exempt BAs occur less frequently than every year, but for the purpose of estimation we will conservatively assume one appears each year creating an additional burden and cost associated with the Commission’s FERC–740 of one hour and \$65.68.⁴

Type of Respondents: Purchasing-Selling Entities and Balancing Authorities.

*Estimate of Annual Burden:*⁵ The Commission estimates the burden and cost for FERC–740 as follows based on the distinct e-Tags submitted to the Commission in 2017 (the most recent full year available).

FERC–740	Number of respondents (1)	Annual number of responses per respondent (2)	Total number of responses (1) * (2) = (3)	Average burden hours and cost per response (4)	Total annual burden hours and total annual cost (3) * (4) = (5)	Cost per respondent (\$) (5) ÷ (1)
Purchasing-Selling Entities (e-Tag Authors). Balancing Authorities	355 81	4,482 (rounded) 19,645 (rounded).	1,591,208 1,591,208	Automatic, so 0 burden and cost. Automatic, so 0 burden and cost.	Automatic, so 0 burden and cost. Automatic, so 0 burden and cost.	Automatic, so 0 burden and cost. Automatic, so 0 burden and cost.
New Balancing Authority [as noted above].	1	1	1	1 hr.; \$65.68	1 hr.; \$65.68	\$65.68.
Total	1 hr.; \$65.68	\$65.68.
