

extending into their LEPC's jurisdiction. Individuals anywhere may use the Vulnerable Zone Indicator System (VZIS) to find out whether a specified address is within the vulnerable zone of one or more stationary sources.

The final rule also authorizes and encourages state and local government officials to have access to OCA information relevant to their jurisdiction, both for their own official use and to appropriately disseminate to the local public population.

This ICR is intended to renew EPA's approval to carry out the recordkeeping and reporting requirements created by the final rule as it defines the practices that state and local officials need to follow in order to share the data they have and the specific procedures that different categories of individuals need to follow in order to request information, certify their identity, and receive OCA data.

Form Numbers: None.

Respondents/affected entities: State and local agencies and the public.

Respondent's obligation to respond: Required to obtain or retain a benefit (40 CFR 1400).

Estimated number of respondents: 315 (total).

Frequency of response: As necessary.

Total estimated burden: 367 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$16,252 (per year), includes \$23 annualized capital or operation & maintenance costs.

Changes in the Estimates: This ICR renewal includes a significant decrease in the estimated burden compared to the previous ICR renewal. The burden reduction is attributable to the reduced number of reading room visits by the public, the reduced number of letters of request for OCA from state and local governments and LEPCs, and a reduced number of public meetings assumed to be held by LEPCs resulting from the lower of letters of request submitted by LEPCs. To a large extent, the reductions are the result of the respondents increasingly obtaining the OCA data through electronic methods, for example, through *rtk.net*, RMP*Info and RMP Data Download.

SUPPLEMENTARY INFORMATION:

I. What action is the Agency taking?

In the **Federal Register** of April 10, 2019 (84 FR 14365) (FRL-9991-20), EPA published information pertaining to submissions in January 2019 under TSCA Section 5, including notice of receipt of a Premanufacture notice (PMN), Significant New Use Notice (SNUN) or Microbial Commercial Activity Notice (MCAN), including an amended notice or test information; an exemption application (Biotech exemption); an application for a test marketing exemption (TME), both pending and/or concluded; a notice of commencement (NOC) of manufacture (including import) for new chemical substances; and a periodic status report on new chemical substances that are currently under EPA review or have recently concluded review. Subsequent to that publication, a stakeholder noticed that the information in Table II of Unit III. appeared to be identical to the information provided for December 2018 (see 84 FR 14368, April 10, 2019) (FRL-9990-59). EPA is hereby publishing the corrected information for January 2019 and providing an opportunity for public comments on this new information.

II. What is this correction?

In Unit I.A., the first sentence incorrectly identified the period covered by the notice as “from 01/01/2019 to 12/31/2019,” rather than just the month of January. Instead, it should have identified the period covered by the notice as “from 01/01/2019 to 01/31/2019.”

In addition, the information in Table II of Unit III., which appears on page 14367, is corrected to read as follows:
