

agreements to conduct activities allowed under both assessment and cleanup cooperative agreements; cooperative agreements to capitalize revolving loan funds and provide subgrants for cleanup activities; area-wide planning cooperative agreements to develop revitalization plans for brownfields; and environmental workforce and development job training and placement programs. Under subtitle C of the Small Business Liability Relief and Brownfields Revitalization Act, states and tribes can receive cooperative agreements to establish and enhance their response programs through the four elements and meet the public record requirements under the statute. Cooperative agreement recipients (“recipients”) have general reporting and record keeping requirements as a condition of their cooperative agreement that result in burden. A portion of this reporting and record keeping burden is authorized under 2 CFR part 1500 and identified in the EPA’s general grants ICR (OMB Control Number 2030–0020). EPA requires Brownfields program recipients to maintain and report additional information to EPA on the uses and accomplishments associated with funded brownfields activities. EPA uses several forms to assist recipients in reporting the information and to ensure consistency of the information collected. EPA uses this information to meet Federal stewardship responsibilities to manage and track how program funds are being spent, to evaluate the performance of the Brownfields Cleanup and Land Revitalization Program, to meet the Agency’s reporting requirements under the Government Performance Results Act, and to report to Congress and other program stakeholders on the status and accomplishments of the program.

Form Numbers: 6200–03, 6200–04, 6200–14, 6200–17.

Respondents/affected entities: State/local/tribal governments; Non-Profits.

Respondent’s obligation to respond: Required to obtain or Retain Benefits (2 CFR part 1500).

Estimated number of respondents: 5,438 (total).

Frequency of response: Bi-annual for subtitle C recipients; quarterly for subtitle A recipients.

Total estimated burden: 5,765 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$667,181 (per year), includes \$0 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is an increase of 1,888 hours in the total estimated respondent burden compared with the ICR currently approved by

OMB. This increase is partially the result of adding the new Program Activity Levels Form for 128(a) recipients to fill out annually. The remainder of the burden increase is the result of an overall increase in wages and the large increase in the number of responses submitted to ACRES annually due to more grants being awarded. Even with this increase, respondents indicated that improvements in the ACRES reporting system and increased familiarity with the program lead to a lower burden per individual entry.

Abstract: The Beaches Environmental Assessment and Coastal Health (BEACH) Act amends the Clean Water Act (CWA) in part and authorizes the U.S. Environmental Protection Agency (EPA) to award BEACH Act Program Development and Implementation Grants to coastal and Great Lakes states, tribes, and territories (collectively referred to as jurisdictions) for their beach monitoring and notification programs. The grants assist those jurisdictions to develop and implement a consistent approach to monitor recreational water quality; assess, manage, and communicate health risks from waterborne microbial contamination; notify the public of pollution occurrences, and post beach advisories and closures to prevent public exposure to microbial pathogens. To qualify for a BEACH Act Grant, a jurisdiction must submit information to the EPA documenting that its beach monitoring and notification program is consistent with performance criteria outlined in the *National Beach Guidance and Required Performance Criteria for Grants, 2014 Edition*.

Form Numbers: None.

Respondents/affected entities: Entities potentially affected by this action are environmental and public health

agencies in coastal and Great Lakes states, territories, and tribes.

Respondent's obligation to respond: Required to obtain the grants as directed by the BEACH Act amendment to the CWA.

Estimated number of respondents: 39 (total).

Frequency of response: Annual; however, the Agency encourages more frequent reporting to provide more up-to-date information to the public.

Total estimated burden: 88,569 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$14,865,812 (per year), includes \$11,063,780 (per year) operation & maintenance costs. There are no capital costs.

Changes in the Estimates: There is a decrease of 2,707 hours in the total respondent burden compared with the ICR currently approved by OMB. This decrease is due to the respondents no longer needing to prepare and submit schedules for the adoption of new or revised water quality standards (WQS) and identification and use of a beach notification threshold (BNT). The EPA no longer requests respondents submit these schedules because they are using BNTs or alternate BNTs and have either adopted new or revised WQS or are in the process of doing so. This decrease in hours is partially offset by one additional tribe having qualified for a BEACH grant. The total respondent cost decreased by \$587,496. The decrease in cost is partially offset by slight increases in the salary rates. The O&M decreased by \$289,366 due to a reduction in the total number of beaches. The number of beaches reported by the jurisdictions varies from year to year for many reasons. Reasons for removing beaches include the destruction of beaches by natural disasters, change in beach ownership, and existing beaches being combined within a jurisdiction's monitoring and notification program.

Director, Regulatory Support Division.
