k. *Description of Request:* The exemptee is seeking a permanent amendment, or in the alternative a temporary amendment for 2019 while the Commission reviews the permanent amendment request. This notice only seeks comments, motions to intervene, and protests on a temporary variance from the authorized target elevation, for the period from May 15 through November 15, 2019, which is consistent with the time period for the previously granted temporary variances.

The exemptee requests authorization to operate the project at a target elevation of 802.9 feet mean sea level (msl) during the "ice-free period," while continuing to operate the project within the authorized elevation range of 801.83 feet msl and 803.17 feet msl. The exemptee defines the "ice-free period" as between May 15 and September 15. The exemptee would continue to operate at the current authorized target elevation of 802.5 feet msl and within the authorized elevation range of 801.83 feet msl and 803.17 feet msl at all other times of the year. The exemptee states the amendment is necessary to address

recreation and possible public safety concerns when operating the project at the authorized target elevation.

In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.
