SUPPLEMENTARY INFORMATION:

Background: The USIBWC is identifying aquatic habitat restoration projects within the Rio Grande Canalization Project (RGCP). On June 4, 2009, the USIBWC issued a Record of Decision (ROD) on the long-term management of the RGCP. The ROD committed the USIBWC to the restoration of aquatic and riparian habitat at up to 30 sites over 10 years (through 2019).

The purpose is to identify, design, and implement aquatic habitat restoration sites to satisfy USIBWC's commitment for aquatic habitat in the 2009 ROD. Restoration actions could include invasive vegetation removal, native vegetation planting, overbank lowering, bank cuts, natural levee breaches, secondary channels, bank destabilization, channel widening, arroyo mouth management, construction of inset floodplains, and use of supplemental water for on-site irrigation.

The EA evaluates potential impacts of eight alternatives, including the No Action Alternative and the following sites: Yeso Arroyo, Angostura Arroyo, Broad Canyon Arroyo, Selden Point Bar, Las Cruces Effluent, Mesilla Valley Bosque State Park, and Downstream of Courchesne Bridge. Under the Preferred Alternative, USIBWC would implement up to four sites (Broad Canyon Arroyo, Selden Point Bar, Las Cruces Effluent, and Downstream of Courchesne Bridge). Permits would be required from the United States Army Corps of Engineers for dredge and fill of Waters of the United States, per the Clean Water Act Sections 404 and 401. Alternatives Las

Cruces Effluent and Downstream of Courchesne Bridge would require engineering designs prior to construction, while Alternatives Broad Canyon Arroyo and Selden Point Bar, which are smaller and less complicated projects, could be constructed from conceptual designs.

Potential impacts on natural, cultural, and other resources were evaluated in the Draft EA. A FONSI has been prepared for the Preferred Alternatives, based on a review of the facts and analyses contained in the Draft EA.

Availability: The electronic version of the Draft EA is available at the USIBWC web page: https://www.ibwc.gov/EMD/EIS_EA_Public_Comment.html.

Dated: May 24, 2019.

Chief Legal Counsel, International Boundary and Water Commission, United States Section.

SUPPLEMENTARY INFORMATION:

Background: On June 4, 2009, the USIBWC issued a Record of Decision (ROD) on the long-term management of the Rio Grande Canalization Project (RGCP) through 2019. The ROD committed the USIBWC to implement environmental measures, change management practices, and update the River Management Plan (RMP). The RMP covers levee maintenance; vegetation management; continued implementation and maintenance of restoration sites; endangered species management; channel maintenance; and channel maintenance alternatives (CMAs) within the USIBWC right-of-way (ROW). The EA will replace the ROD and proposes a timeline to implement the RMP through 2030. The EA evaluates potential impacts of seven

alternatives, including the No Action Alternative. Under the Preferred Alternative, USIBWC would continue implementation of the RMP; designate up to 65 miles through the USIBWC ROW for the New Mexico Rio Grande Trail and Texas trails; re-evaluate and construct additional CMAs potentially outside of the ROW; increase efforts to engage stakeholders through the Sediment Control Initiative Federal Workgroup and stakeholder groups; and transfer up to 500 acres of restoration outside of the USIBWC jurisdiction of either No-Mow Zone managed grasslands or unsuccessful habitat restoration, via partnerships.

Potential impacts on natural, cultural, and other resources were evaluated. A Finding of No Significant Impact has been prepared for the Preferred Alternative based on a review of the facts and analyses contained in the Draft EA.
