

List (NPL). Only sites on the NPL are eligible for Superfund-financed remedial actions. For the NCP information collection, some community involvement activities covered by this ICR are not required at every site (e.g., Technical Assistance Grants) and depend very much on the community and the nature of the site and cleanup. All community activities seek to involve the public in the cleanup of the sites, gain the input of community members, and include the community's perspective on the potential future reuse of Superfund NPL sites. Community involvement activities can enhance the remedial process and increase community acceptance and the potential for productive and beneficial reuse of the sites.

Form Numbers: 6200–11.

Respondents/affected entities: State, Local or Tribal Governments; Communities; U.S. Territories.

Respondent's obligation to respond: Required to obtain benefits (40 CFR part 35; CERCLA section 105, 40 CFR part 300).

Estimated number of respondents: 13,182 (total).

Frequency of response: Annually.

Total estimated burden: 196,557 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$463,497 (per year), includes \$0 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is a decrease of 679,972 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This decrease is due to an overall decrease in the number of respondents and responses for the Superfund Site Evaluation and Hazard Ranking System, Cooperative Agreements and Superfund State Contracts for Superfund Response Actions, and for the National Oil and Hazardous Substances Pollution Contingency Plan.
