DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

44 CFR Part 206

[Docket ID FEMA–2014–0005]
RIN 1660–AA83

Factors Considered When Evaluating a Governor’s Request for Individual Assistance for a Major Disaster; Correction

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Final rule; correction.

SUMMARY: The Federal Emergency Management Agency (FEMA) is correcting a final rule that published in the Federal Register on March 21, 2019. The rule revises the Individual Assistance factors FEMA uses to measure the severity, magnitude, and impact of a disaster. This document corrects two typographical errors in the preamble to the final rule and corrects the authority citation.

DATES: Effective June 1, 2019.

FOR FURTHER INFORMATION CONTACT: Mark Millican, FEMA, Individual Assistance Division, 500 C Street SW, Washington, DC 20472–3100, (phone) 202–220–3221 or (email) FEMA–IA–Regulations@fema.dhs.gov.

SUPPLEMENTARY INFORMATION: In FR Doc. 2019–05388 appearing on page 10632 in the Federal Register of Thursday, March 21, 2019, the following corrections are made:

1. On page 10647, in the third column, in the first full paragraph, “highlight” is corrected to read “highly”, that shows that TTR and population are highly correlated.”

2. On page 10653, in the first column, in footnote 61, in the first sentence, “Table 6” is corrected to read “Table 5”.

PART 206—[CORRECTED]

3. On page 10663, in the second column, in amendatory instruction 1, the authority citation for part 206 is corrected to read as follows:

Peter Gaynor,
Acting Administrator, Federal Emergency Management Agency.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 2, 5, and 15

[ET Docket No. 18–21, RM–11795, FCC 19–19]

Spectrum Horizons

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: In this document, the Commission took steps to provide new opportunities for innovators and experimenters to develop new equipment and applications for spectrum between 95 GHz and 3 THz, frequencies that only recently are becoming well-suited for the development and deployment of new active communications services and applications. The Commission adopt rules for a new class of experimental licenses available for the spectrum above 95 GHz that provide for increased flexibility. In addition, the Commission will make 21.2 gigahertz of spectrum in the 116–123 GHz band, the 174.8–182 GHz band, the 185–190 GHz band, and the 244–246 GHz bands for unlicensed use under rules with technical parameters similar to those currently in place for unlicensed operation in the 57–71 GHz band.

DATES: Effective July 5, 2019, except for §§ 5.59, 5.77, 5.121, 5.702, 5.703, 5.704, 5.705 and 15.258, which are delayed.

FOR FURTHER INFORMATION CONTACT: Mr. Brian Butler of the Office of Engineering and Technology, Policy and Rules Division, at (202) 418–2702, or Brian.Butler@fcc.gov.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission’s Report and Order, ET Docket No. 18–21, and RM–11795, FCC 19–19, adopted March 15, 2019 and released March 21, 2019. The full text of this document is available for public inspection and copying during normal business hours in the FCC Reference Center (Room CY–A257), 445 12th Street SW, Washington, DC 20554, or by downloading the text from the Commission’s website at https://www.fcc.gov/document/fcc–opens-spectrum-horizons-new-services–technologies–0. Alternative formats are available for people with disabilities (Braille, large print, electronic files, audio format) by sending an email to fcc504@fcc.gov or calling the Commission’s Consumer and Governmental Affairs Bureau at (202) 418–0530 (voice), (202) 418–0432 (TTY).

Synopsis

Spectrum Horizons Experimental Radio Licenses

The Commission adopt rules for a new experimental radio license, the Spectrum Horizons Experimental Radio License (Spectrum Horizons License), that will be available for experiments and demonstrations of equipment designed to operate exclusively on any frequency above 95 GHz. The Spectrum Horizons License rules will incorporate the proposals that the Commission made in the Notice of Proposed Rulemaking (NPRM) in this proceeding (83 FR 13888). Specifically, the Spectrum Horizons License will differ from other experimental radio licenses by providing for, among other things, broad eligibility, a longer term, and additional flexibility to market devices. The Commission expects that, collectively, these Spectrum Horizons License features should promote a more rapid development of new products and services that will reach a larger number and wider variety of users than it would be possible under the existing experimental licensing rules.

1. Available Frequencies. Applicants for Spectrum Horizons Licenses may request authorization on any frequency within the 95 GHz to 3 THz frequency range. Given the unique characteristics of these bands, and concern that it could stifle innovation or limit an applicant...
