SUPPLEMENTARY INFORMATION: The Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils, in conjunction with NOAA Fisheries and the Atlantic and Gulf States Marine Fisheries Commissions, have implemented the Southeast Data, Assessment and Review (SEDAR) process, a multi-step method for determining the status of fish stocks in the Southeast Region. SEDAR is a three-step process including: (1) Data Workshop; (2) Assessment Process utilizing webinars; and (3) Review Workshop. The product of the Data Workshop is a data report which compiles and evaluates potential datasets and recommends which datasets are appropriate for assessment analyses. The product of the Assessment Process is a stock assessment report which describes the fisheries, evaluates the status of the stock, estimates biological benchmarks, projects future population conditions, and recommends research and monitoring needs. The assessment is independently peer reviewed at the Review Workshop. The product of the Review Workshop is a Summary documenting panel opinions regarding the strengths and weaknesses of the stock assessment and input data. Participants for SEDAR Workshops are appointed by the Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils and NOAA Fisheries Southeast Regional Office, Highly Migratory Species Management Division, and Southeast Fisheries Science Center. Participants include: Data collectors and database managers; stock assessment scientists, biologists, and researchers; constituency representatives including fishermen, environmentalists, and non-governmental organizations (NGOs); international experts; and staff of Councils, Commissions, and state and federal agencies.

The items of discussion at the Assessment Milestone 1 webinar are as follows:

- Consider methods and configuration options for models;
- Recommend assessment methods (*i.e.*, model types) to pursue for potential base model configuration;
- Identify likely issues to be addressed and evaluated in developing the base model.

Although non-emergency issues not contained in this agenda may come

before this group for discussion, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically identified in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the intent to take final action to address the emergency.

Special Accommodations

This meeting is accessible to people with disabilities. Requests for auxiliary aids should be directed to the SAFMC office (see **ADDRESSES**) at least 5 business days prior to the meeting.

DEPARTMENT OF COMMERCE**National Oceanic and Atmospheric Administration****Submission for OMB Review; Comment Request**

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: National Oceanic and Atmospheric Administration (NOAA).

Title: Economic Analysis of Shoreline Treatment Options for Coastal New Hampshire.

OMB Control Number: 0648-xxxx.

Form Number(s): None.

Type of Request: Regular (new collection).

Number of Respondents: 4,633.

Average Hours per Response: 0.27.

Burden Hours: 1,248.

Needs and Uses: This request is for a pretest of a new data collection to benefit the National Oceanic and Atmospheric Administration (NOAA), Office of Coastal Management (OCM), and decision-makers on the state and local level in New Hampshire. The New Hampshire Coastal Program (NHCP) has prioritized living shoreline assessment and implementation in its five-year strategy to enhance coastal management

(309 Strategy, 2015) and set a long-term goal to develop a Coastal Shoreline Management Plan (CSMP) for New Hampshire. NOAA will collect social, economic, and behavioral data pursuant to the Coastal Zone Management Act (CZMA).

Questions will explore such issues as familiarity with weather and climate effects and adaptation methods, place attachment, and opinions on shoreline treatment options. The final collection will support the development of a CSMP for New Hampshire, provide information to help inform local coastal zone management and planning, and establish a baseline for future monitoring of NOAA's success in meeting its mandates and obligations.

Affected Public: Individuals and households.

Frequency: One time.

Respondent's Obligation: Voluntary.

This information collection request may be viewed at reginfo.gov. Follow the instructions to view Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to OIRA_Submission@omb.eop.gov or fax to (202) 395-5806.

Sheleen Dumas,

SUPPLEMENTARY INFORMATION:

I. Abstract

Type of Review: Regular submission (revision and extension of a current information collection).

The Security and Accountability for Every Port Act of 2006 (SAFE Port Act, Pub. L. 109-347) requires all Federal agencies with a role in import admissibility decisions to collect information electronically through the International Trade Data System (ITDS). The Department of the Treasury has the U.S. Government lead on ITDS development and Federal agency integration. U.S. Customs and Border Protection (CBP) developed the Automated Commercial Environment (ACE) as an internet-based system for the collection and dissemination of information for ITDS. The Office of Management and Budget (OMB), through its e-government initiative, oversees Federal agency participation in ITDS, with a focus on reducing duplicate reporting across agencies and migrating paper-based reporting systems to electronic information collection.

Numerous Federal agencies are involved in the regulation of international trade and many of these agencies participate in the import, export, and transportation-related decision-making process. Agencies also use trade data to monitor and report on trade activity. NMFS is a partner government agency in the ITDS project because of its role in monitoring the trade of certain fishery products. Electronic collection of seafood trade data through a single portal has resulted in an overall reduction of the public reporting burden and the agency’s data collection costs, has improved the timeliness and accuracy of admissibility decisions, and has increased the
