Proposed Reissuance of NPDES General Permits for Aquaculture Facilities in Idaho Excluding Facilities Discharging into the Upper Snake-Rock Subbasin (IDG131000) and Aquaculture Facilities Located in Indian Country in Idaho (IDG133000)**AGENCY:** Environmental Protection Agency (EPA).**ACTION:** Notice of proposed reissuance of NPDES General Permits and request for public comment.

SUMMARY: The Director of the Water Division, EPA Region 10, is proposing to reissue two aquaculture National Pollutant Discharge Elimination System (NPDES) General Permits; Aquaculture Facilities in Idaho Excluding Facilities Discharging into the Upper Snake-Rock Subbasin, and Aquaculture Facilities Located in Indian Country in Idaho. As proposed, the General Permits will authorize discharges of wastewater from cold water and warm water Concentrated Aquatic Animal Production facilities (also referred to as CAAPs or "hatcheries"). The permits will largely replace and combine the NPDES General Permit for Cold Water Aquaculture Facilities in Idaho (not subject to Wasteload Allocations) (IDG131000) and the NPDES General Permit for Aquaculture Facilities in Idaho (subject to Wasteload Allocations) (IDG130000) but will exclude facilities discharging within the Upper Snake-Rock Subbasin. The EPA is not taking action on coverage for facilities that discharge within the Upper Snake-Rock Subbasin under IDG130000 at this time; those facilities with coverage will remain covered under IDG130000. Coverage for facilities under IDG130000 that are *not* within the Upper Snake-Rock Subbasin will be terminated once coverage under IDG131000 or IDG133000 is available. In addition, with this reissuance, the EPA is separating out discharges from aquaculture facilities located in Indian Country in Idaho under a separate General Permit number (IDG133000). This will facilitate the transfer of IDG131000 to the State of Idaho in 2020 as part of the phased implementation of Idaho's administration of the NPDES Program. EPA will remain the permitting authority for IDG133000.

DATES: Comments must be received by July 22, 2019.**ADDRESSES:** Comments on the draft General Permits may be mailed to:

Director, Water Division; USEPA Region 10; 1200 Sixth Avenue, Suite 155, WD19-C09; Seattle, WA 98101, or may also be submitted by fax to (206) 553-0165 or electronically to kusnierz.lisa@epa.gov.

FOR FURTHER INFORMATION CONTACT:

Permit documents may be found on the EPA Region 10 website at: www.epa.gov/npdes-permits/draft-npdes-general-permits-aquaculture-facilities-idaho. Copies of the draft General Permits and Fact Sheet are also available upon request. Requests may be made to Audrey Washington at (206) 553-0523 or to Lisa Kusnierz at (208) 378-5626. Requests may also be electronically mailed to: washington.audrey@epa.gov, or kusnierz.lisa@epa.gov.

SUPPLEMENTARY INFORMATION:**I. General Information**

There are approximately 25 facilities eligible for coverage under the two General Permits. The Permits generally share the same conditions but differ in that IDG131000 is for facilities discharging to waters of the U.S. in Idaho (excluding facilities discharging within the Upper Snake-Rock Subbasin) and IDG133000 is for facilities discharging to waters of the U.S. within Indian Country in Idaho. Aquaculture facilities may use one of several types of production systems, including ponds, flow-through systems, and recirculating systems. Most of the facilities eligible for coverage by the General Permits use flow-through systems. Most facilities have a quiescent zone at the bottom of their raceways to allow solids and debris to settle out (where they can be vacuumed and removed) and use a full-flow settling basin or offline settling basin to remove sediment and associated pollutants prior to discharge.

The General Permits have numeric effluent limits for total phosphorus and total suspended solids for all facilities and temperature limits for some facilities, as well as prohibitions on certain discharges and practices. Numeric limitations for facilities may differ depending on applicable Total Maximum Daily Load (TMDL) wasteload allocations. Permit conditions include reporting requirements for the usage of drugs and chemicals and development of a Best Management Practices Plan that addresses solids control, operational requirements, materials storage, structural maintenance, recordkeeping, and training.

The basis for the conditions and requirements of the draft General Permits are given in the Fact Sheet.

Facilities will receive a written notification from the EPA whether permit coverage and authorization to discharge under one of the General Permits is approved. Major changes in the permit conditions from the 2007 General Permit include: Removal of the percent total suspended solids removal requirement for offline settling basins, prohibition on copper usage, the addition of continuous temperature monitoring for some facilities, and miscellaneous monitoring revisions.

The EPA has completed a Biological Evaluation for these Permit actions. Consultation under the Endangered Species Act between the EPA and the National Marine Fisheries Service and the U.S. Fish and Wildlife Service has been completed. The Services concurred on the EPA's determination that the Permit actions are not likely to adversely affect species listed under the Endangered Species Act or designated critical habitat.

II. Other Legal Requirements

This action was submitted to the Office of Management and Budget (OMB) for review under Executive Orders 12866, *Regulatory Planning and Review*, and 13563, *Improving Regulation and Regulatory Review*, and was determined to be not significant. Compliance with Endangered Species Act, Essential Fish Habitat, Paperwork Reduction Act, and other requirements are discussed in the Fact Sheet to the proposed permits.

Dated: May 22, 2019.

General description of report: Any national bank wanting to purchase stock in the Federal Reserve System, any member bank wanting to increase or decrease its Federal Reserve Bank stock holdings, or any bank wanting to cancel its stock holdings must file an application with the appropriate Federal Reserve Bank. The application forms for the initial subscription of Federal Reserve Bank stock filed by organizing national banks and nonmember state banks converting to national banks (FR 2030 and 2030a, respectively) and the application forms for the cancellation of Federal Reserve Bank stock filed by liquidating member banks, member banks merging or consolidating with nonmember banks, and insolvent member banks (FR 2086, FR 2086a, and FR 2087, respectively) require one or more of the following: A resolution by the applying bank's board of directors authorizing the transaction, an indication of the capital and surplus of the bank as of the date of application, a certification (by official signatures) of the resolution, and/or an indication of the number of shares and dollar amount of the Federal Reserve Bank stock to be purchased or cancelled.

The application form for an interim adjustment in a member bank's holdings of Federal Reserve Bank stock (FR 2056) requires an indication of the capital and surplus of the bank as of the date of application and an indication of the number of shares held and the number of shares to be acquired or canceled.

A completed application form must be submitted for each required adjustment. Any member bank must use the FR 2056 to correct a discrepancy between the amount of Federal Reserve Bank stock required to be held and the amount actually held by the member bank. The latter is determined by the Reserve Bank through its monitoring of the bank's capital accounts reported quarterly on the Consolidated Reports of Condition and Income (Call Report) (FFIEC 031, FFIEC 041, and FFIEC 051; OMB No. 7100–0036). The Federal Reserve Bank stock applications are distributed by the Federal Reserve

Banks and the information collected enables them to account for required subscription, adjustment, or cancellation payments to and from the System and for dividends paid by the System on any outstanding stock.

Report title: Federal Reserve Membership Application.

Agency form number: FR 2083/A/B/C.

OMB control number: 7100-0046.

Respondents: Member banks converting into or merging into member or non-member banks.

Estimated number of respondents: 16.

Estimated average hours per response: 4.

Estimated annual burden hours: 64.

General description of report: The four individual application forms in the FR 2083 series (membership application and relevant attachments) are all one-time submissions that are used by organizing (new) or existing state-chartered banks to apply for membership in the Federal Reserve System. The FR 2083 contains a cover sheet, with general information and instructions detailing the information to be submitted according to the type of applicant bank. The FR 2083A is the application form for the purchase of Federal Reserve Bank stock by state banks (except mutual savings banks) and by national banks converting into state member banks. The FR 2083B is the application form for the purchase of Federal Reserve Bank stock by mutual savings banks. The FR 2083C is the Certificate of Organizers or Directors certifying that the information being submitted is true and complete, and the proposed capital is not impaired.

Legal authorization and confidentiality: The Federal Reserve Membership Application is authorized by Section 9 of the Federal Reserve Act (FRA) (12 U.S.C. 321, 322, 323, 329, and 333). The FR 2083 is required to obtain a benefit, while the FR 2030, FR 2030a, FR 2056, FR 2086, FR 2086a, and FR 2087 are mandatory. Individual respondents may request that information submitted to the Board in these applications be kept confidential on a case-by-case basis.
