million train-miles of PTC operations have been accumulated on the Portland subdivision without a critical anomaly. Additionally, PTC operations have been conducted under the provisions of a waiver, Docket Number FRA–2016–0108, which allows for the use of PTC in lieu of cab signals on the Portland subdivision and elsewhere on UP where automatic cab signal (ACS), automatic train control, and automatic train stop systems are present. To ensure that an equivalent or greater level of safety is maintained upon discontinuance of the ACS and to meet the requirements of 49 U.S.C. 20157(j)(1), UP asserts it will promulgate operating rules requiring that any train on which PTC fails to initialize, cuts out, or malfunctions comply with operating restrictions in accordance with 49 CFR 236.1029, while operating within former ACS limits of the Portland subdivision. UP explains it believes that the combination of the current levels of PTC reliability and, utilization, combined with the application of operating restrictions under failure conditions result in a level of safe operation which justifies discontinuance of the ACS system on the Portland subdivision.
