

comment on the draft guidance, we issued a notice in the **Federal Register** of April 25, 2018 (83 FR 17961) extending the comment period to June 15, 2018. We received over 3,600 comments to the draft guidance from industry, consumer advocacy groups, trade associations, members of Congress, State governments, and private citizens.

After consideration of the comments to the draft guidance, as well as Public Law 115–334, we have made changes in the final guidance to clarify the requirements for the labeling of added sugars on packages and/or containers of single ingredient honey, maple syrup, and other single ingredient sugars and syrups. The final guidance clarifies that the line representing added sugars on the Nutrition Facts label, as well as the percent Daily Value on that line, are retained for single-ingredient sugars and syrup, however these products do not need to have the statement “Includes Xg Added sugars” on that line. The final guidance also explains our intent to exercise enforcement discretion for all single ingredient sugars and syrups with respect to the inclusion of a “+” symbol after the percent Daily Value, which leads the reader to a truthful and not misleading statement within a footnote at the bottom of the Nutrition Facts label that includes a description of the gram amount of sugar added to the diet by one serving of the product and its contribution to the percent Daily Value for added sugars in the diet.

We are finalizing the guidance without any changes with respect to our intent to exercise enforcement discretion for the use of a “+” symbol that would direct consumers to truthful and not misleading statements on the package outside the Nutrition Facts label on certain cranberry products sweetened with added sugars that provide an amount of total sugars in a serving that does not exceed the level of total sugars in a serving of a comparable product with no added sugars.

At this time, we are not aware of products, other than the cranberry products discussed in the guidance document, for which the addition of sugars is intended to increase palatability, and for which the amount of total sugars per serving is at a level that does not exceed the amount of total sugars in a comparable product with no added sugars. Therefore, at this time we do not intend to exercise enforcement discretion with respect to the use of the “+” that would direct consumers to truthful and not misleading statements on the package outside the Nutrition Facts label on products, including dairy

products and whole grain products, other than the cranberry products discussed in the guidance document. We specifically note that we do not intend to exercise enforcement discretion with respect to beverages made from açai berries because it appears that açai berry beverages are made, at least in part, from açai berries combined with water. Therefore, we do not consider açai berry beverages to be a comparable product to other naturally sweet juices. Furthermore, we do not have sufficient evidence to show that sugars are added to açai berries to increase palatability like the naturally tart fruit described in the 2015–2020 Dietary Guidelines for Americans (available at <https://www.dietaryguidelines.gov/current-dietary-guidelines>). We note that we would consider whether the same type of enforcement discretion discussed with respect to certain cranberry products might be warranted for other products for which the addition of sugars is intended to increase palatability, such as naturally tart fruits, and for which the amount of total sugars per serving is at a level that does not exceed the amount of total sugars in a comparable product with no added sugars.

Further, the final guidance announces our intent to exercise enforcement discretion, until July 1, 2021, regarding the compliance with the Nutritional Facts Label final rule and Serving Size final rule (81 FR 33742 and 81 FR 34000 (May 27, 2016)) requirements for single-ingredient packages and/or containers of pure honey, pure maple syrup, and other pure sugars and syrups, as well as certain dried cranberry and cranberry beverage products. We recognize the importance of giving manufacturers of such products additional time to make appropriate label changes consistent with the Farm Bill and this final guidance. With respect to our enforcement discretion policy pertaining to compliance with updated Nutrition Facts label and serving size requirements, this part of the guidance is being implemented without prior public comment because we have determined that prior public participation is not feasible or appropriate (21 CFR 10.115(g)(2)).
