Background: Traffic-related air pollution and hypertensive disorders of pregnancy were selected for review following nomination in July 2012 to evaluate emerging children’s health issues associated with ambient air pollution and review by the NTP Board of Scientific Counselors on April 18, 2014. After considering the literature on children’s health outcomes, the scope was narrowed to focus on traffic-related air pollution and hypersensitive disorders of pregnancy due to: (1) The significant impact of hypertension in pregnancy on children’s health, and (2) A number of recent studies assessing hypertensive outcomes in pregnant women exposed to traffic-related air pollution. Information on NTP’s review process, which may be published as a NTP monograph, NTP technical report, or peer-reviewed journal publication. Information about OHAT is available on the OHAT website (https://ntp.niehs.nih.gov/go/ohat).

Dated: June 13, 2019.
