As part of this investigation, the Corps will evaluate the existing recreation demand and tourism opportunities provided by each project. Annual Responses: 4,500.

Average Burden per Response: 15 minutes.

Respondents are public visitors to US Army Corps of Engineers Recreation Areas. Visitors exiting the recreation area by vehicle are stopped as potential respondents. Participation is voluntary. Respondents are asked questions in the following categories; characteristics of visit, number of people in the vehicle, description of overnight stay, activity participation, number of trips, income level, age group, sex, and parking facilities.

The onsite survey at the project beaches will focus on users, visit intensity, and preferences for site quality. Survey will collect recent historical trip decisions, contingent behavior (CB) responses describing how visitation might change with site quality (e.g. loss of beach due to erosion; increasing beach area due to replenishment), and stated preference responses designed to assess support for beach management policy.
