**SUPPLEMENTARY INFORMATION:** This EIS will tier to and incorporate by reference the 2016 Tongass Land and Resource Management Plan (Forest Plan) Final EIS. The project area is located on Revillagigedo Island, approximately 17 miles northeast of Ketchikan, Alaska, within the Ketchikan Misty Fjords Ranger District, Tongass National Forest and encompasses about 56,282 acres of National Forest System lands.

### Purpose and Need for Action

The purpose of the South Revilla IRP is to implement the 2016 Forest Plan direction to move the project area toward the desired future conditions described in that plan. More specifically, the purpose is to manage the timber resource for production of sawtimber and other wood products, improve ecosystem and watershed health, and provide a range of recreation opportunities to meet public and tourism business demand through an integrated approach to meet multiple resource objectives. Maintaining existing and expanding future opportunities for the recreation and tourism sector would contribute to the local economy.

There is a need to provide a sustainable level of forest products to contribute to the economic sustainability of the region. Providing old-growth timber and currently merchantable young-growth timber would preserve a viable timber industry by providing timber volume in an economically efficient manner while providing jobs and opportunities for Southeast Alaska residents. Past management activities have affected watershed function in the project area. There is a need to improve and restore the natural range of habitat conditions in the project area to support viable wildlife, fish, and plant populations and to sustain diversity and production which would contribute to traditional, cultural, and subsistence uses by residents of Southeast Alaska.

There is also a need to provide sustainable recreation opportunities to a diverse and growing group of forest users. A sustainable recreation program in terms of operations and maintenance is needed to maintain infrastructure at an acceptable level.

### Proposed Action

The Forest Service proposes to harvest timber, construct and reconstruct roads, restore watershed function, enhance or restore fish and wildlife habitat, and develop recreation opportunities in the Shelter Cove, Shoal Cove and Thorne Arm areas within the Ketchikan Misty Fjords Ranger District. The project area includes the following land use designations (LUDs): Wilderness, Semi-remote Recreation, Old-growth Habitat, Special Interest Area, Scenic River, Modified Landscape, and Timber Production (Forest Plan, Chapter 3). Maps and information on the 2018 Shelter Cove Recreation Area Master Plan are provided on the project web page at:
