new license for Project No. 7153. Pursuant to 18 CFR 16.8, 16.9, and 16.10 each application for a new license and any competing license applications must be filed with the Commission at least 24 months prior to the expiration of the existing license. All applications for license for this project must be filed by April 30, 2022.

p. Register online at http://www.ferc.gov/docs-filing/esubscription.asp to be notified via email of new filing and issuances related to this or other pending projects. For assistance, contact FERC Online Support.

Kimberly D. Bose,
Secretary.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP19–19–000]

Magnolia LNG, LLC; Notice of Schedule for Environmental Review of the Magnolia LNG Production Capacity Amendment

On November 19, 2018, Magnolia LNG, LLC (Magnolia LNG), filed an application in Docket No. CP19–19–000 requesting an authorization pursuant to Section 3(a) of the Natural Gas Act to amend the authorization granted by the Federal Energy Regulatory Commission (FERC or Commission) on April 15, 2016, in Docket No. CP14–347–000. The proposed project is known as the Magnolia LNG Production Capacity Amendment, and would increase the total production capacity of Magnolia LNG’s liquefaction project from the currently authorized 8 million tons per annum (MTPA) to 8.8 MTPA, or 1.4 billion cubic feet per day. Magnolia LNG states that the increased LNG production capacity would be realized through the optimization of its final design and would not require any increase in the authorized feed gas rates. Magnolia LNG’s approved terminal site is in Lake Charles, Calcasieu Parish, Louisiana, and no new facilities are proposed.

On December 6, 2018, the Commission issued its Notice of Application for the project. Among other things, that notice alerted agencies issuing federal authorizations of the requirement to complete all necessary reviews and to reach a final decision on a request for a federal authorization within 90 days of the date of issuance of the Commission staff’s final environmental document for the project. Subsequent to the issuance of the Notice of Application, staff determined that a supplemental environmental impact statement (EIS) would be necessary for the amended project. This instant notice identifies the FERC staff’s planned schedule for completion of the supplemental final EIS, which is based on issuance of the supplemental draft EIS in September 2019.

Schedule for Environmental Review
Notice of Availability of the supplemental final—EIS January 24, 2020
90-day Federal Authorization Decision Deadline—April 23, 2020
If a schedule change becomes necessary for the final supplemental EIS, additional notice will be provided so that the relevant agencies are kept informed of the project’s progress.

Background
On June 7, 2019, the Commission issued a Notice of Intent to Prepare a Supplemental Environmental Impact Statement for the Proposed Magnolia LNG Production Capacity Amendment and Request for Comments on Environmental Issues (NOI). The NOI was sent to affected landowners; federal, state, and local government agencies; elected officials; environmental and public interest groups; Native American tribes; other interested parties; and local libraries and newspapers. All substantive comments received will be addressed in the supplemental EIS.

Additional Information
In order to receive notification of the issuance of the supplemental EIS and to keep track of all formal issuances and submittals in specific dockets, the Commission offers a free service called eSubscription. This can reduce the amount of time you spend researching proceedings by automatically providing you with notification of these filings, document summaries, and direct links to the documents. Go to www.ferc.gov/docs-filing/esubscription.asp.

Additional information about the project is available from the Commission’s Office of External Affairs at (866) 208–FERC or on the FERC website (www.ferc.gov). Using the “eLibrary” link, select “General Search” from the eLibrary menu, enter the selected date range and “Docket Number” excluding the last three digits (i.e., CP19–19), and follow the instructions. For assistance with access to eLibrary, the helpline can be reached at (866) 208–3676, TTY (202) 502–8659, or at FERCOncileSupport@ferc.gov. The eLibrary link on the FERC website also provides access to the texts of formal documents issued by the Commission, such as orders, notices, and rule makings.

BILLING CODE 6717–01–P

ENVIRONMENTAL PROTECTION AGENCY

Proposed Information Collection Request; Comment Request; Certification and Compliance Requirements for Nonroad Spark-Ignition Engines (Renewal), ICR 1695.11, OMB 2060–0338

AGENCY: Environmental Protection Agency.

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) is planning to submit an information collection request (ICR), “Certification and Compliance Requirements for Nonroad Spark-Ignition Engines (Renewal)”, ICR 1695.11, OMB 2060–0338 to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. Before doing so, EPA is soliciting public comments on specific aspects of the proposed information collection request as described below. This notice is a proposed extension of the Nonroad Spark-Ignition Engines ICR, which is currently approved through October 31, 2019. An Agency may not conduct or sponsor a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

DATES: Comments must be submitted on or before September 3, 2019.

EPA’s policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential
Business Information (CBI) or other information whose disclosure is restricted by statute.

FOR FURTHER INFORMATION CONTACT:
Julian Davis, Attorney Adviser, Compliance Division, Office of Transportation and Air Quality, U.S. Environmental Protection Agency, 2000 Traverwood, Ann Arbor, Michigan 48105; telephone number: 734–214–4029; fax number 734–214–4869; email address: davis.julian@epa.gov.

SUPPLEMENTARY INFORMATION:
Supporting documents which explain in detail the information that the EPA will be collecting will be available in the public docket, EPA–HQ–OAR–2004–0060, for this ICR. The docket can be viewed online at www.regulations.gov or in person at the EPA Docket Center, EPA West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202–566–1744. For additional information about EPA’s public docket, visit http://www.epa.gov/dockets.

Pursuant to section 3506(c)(2)(A) of the PRA, EPA is soliciting comments and information to enable it to: (i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility; (ii) evaluate the accuracy of the Agency’s estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (iii) enhance the quality, utility, and clarity of the information to be collected; and (iv) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses. EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval. At that time, EPA will issue another Federal Register notice to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB.

Abstract: This information collection is requested under the authority of Title II of the Clean Air Act (42 U.S.C. 7521 et seq.) Under this Title, EPA is charged with issuing certificates of conformity for those engines which comply with applicable emission standards. Such a certificate may be issued before engines may be legally introduced into commerce. To apply for a certificate of conformity, manufacturers are required to submit descriptions of their planned production line, including detailed descriptions of the emission control system, and test data. This information is organized by “engine family” groups expected to have similar emission characteristics. The emission values achieved during certification testing may also be used in the Averaging, Banking, and Trading (ABT) Program. The program allows manufacturers to bank credits for engine families that emit below the standard and use the credits for families that emit above the standard. They may also trade banked credits with other manufacturers. Participation in the ABT program is voluntary. Different categories of spark-ignition engines may also be required to comply with production-line testing (PLT) and in-use testing. There are also recordkeeping and labeling requirements. This information is collected electronically by the Gasoline Engine Compliance Center (GECC), Compliance Division, Office of Transportation and Air Quality (OTAQ), Office of Air and Radiation of the U.S. Environmental Protection Agency. GECC uses this information to ensure that manufacturers comply with applicable regulations and the Clean Air Act (CAA). It may also be used by the Office of Enforcement and Compliance Assurance (OECA) and the Department of Justice for enforcement purposes. Non–CBI may be disclosed on OTAQ’s website or upon request under the Freedom of Information Act (FOIA) to trade associations, environmental groups, and the public. Any information submitted for which a claim of confidentiality is made is safeguarded according to EPA regulations at 40 CFR 2.201 et seq.

Form numbers: The EPA has developed forms, some of which are Excel-based, for the compliance programs in this ICR, such as ABT, PLT and In-use Testing, as well as for production reporting. Manufacturers may download these forms from EPA’s website at https://www.epa.gov/vessel-and-engine-certification/compliance-reporting-nonroad-spark-ignition-si-engines and submit these forms through the EPA’s engine and vehicle compliance information system’s (EV–CIS) document module. All of these forms are available for review in the Docket EPA–HQ–OAR–2004–0060.

Respondents/affected entities: Respondents are manufacturers of nonroad engines within the following North American Industry Classification System (NAICS) code:

FEDERAL COMMUNICATIONS COMMISSION

Information Collection Being Submitted for Review and Approval to the Office of Management and Budget

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act (PRA) of 1995, the Federal Communications Commission (FCC or the Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collection. Comments are requested concerning:
