k. *Description of Request:* The exemptee proposes to replace, rather than refurbish, the existing turbine with a horizontal Francis type turbine, and install an induction type generator. To accommodate the smaller turbine and generator, the exemptee would reduce the size of the penstock just outside of the building, and reduce the size of the opening in the floor. As the new, smaller turbine-generator would operate at a wider range of flows, the exemptee proposes to change the minimum and maximum hydraulic capacity of the project to 3 cubic feet per second (cfs) and 36 cfs, respectively. At flows less than 5.6 cfs (the minimum operating capacity of the project plus the minimum flow), the project would not operate and all flow would be released over the spillway. At flows higher than 5.6 cfs, the project would operate and 2.6 cfs would be released over the spillway. The new turbine and generator would have a total installed capacity of 35 kilowatts. Replacement, as proposed, would result in an average generation of between 140,000 and 180,000 kilowatt-hours.

All comments, motions to intervene, or protests must set forth their evidentiary basis and otherwise comply with the requirements of 18 CFR 4.34(b). All comments, motions to intervene, or protests should relate to the request to upgrade the turbine generator units. Agencies may obtain copies of the application directly from the applicant. A copy of any protest or motion to intervene must be served upon each representative of the applicant specified in the particular application. If an intervener files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency. A copy of all other filings in reference to this application must be accompanied by proof of service on all persons listed in the service list prepared by the Commission in this proceeding, in accordance with 18 CFR 4.34(b) and 385.2010.
