

by the PCSRs. In addition, TSA follows up via email with owner/operators on specific recommendations made by TSA during the PCSR.

When combined with information from other companies across the sector, TSA can identify and develop recommended smart practices and security recommendations for the pipeline mode. This information allows TSA to adapt programs to the changing security threat, while incorporating an understanding of the improvements owners/operators make in their security measures. Without this information, the ability of TSA to perform its security mission would be severely hindered.

Portions of PCSR responses that are deemed Sensitive Security Information (SSI) are protected in accordance with procedures meeting the transmission, handling, and storage requirements of SSI set forth in 49 Code of Federal Regulations (CFR) parts 15 and 1520.

The annual hour burden for this information collection is estimated to be between 180 and 220 hours based upon 20 PCSR visits per year, each lasting a total of eight hours and the follow-up regarding security recommendations, lasting approximately one to three hours.

Endangered and Threatened Species; Proposed Low-Effect Habitat Conservation Plan for the Desert Tortoise, Nye County, NV

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of application; request for comments.

SUMMARY: We, the U.S. Fish and Wildlife Service, have received an application from Canyon Mesa Solar, LLC for an incidental take permit under the Endangered Species Act. The requested permit would authorize take of the Mojave desert tortoise resulting from the construction, operation, and maintenance of a solar photovoltaic facility in Pahrump, Nevada. The permit application includes a proposed low-effect habitat conservation plan (HCP). In accordance with the requirements of the National Environmental Policy Act (NEPA), we have prepared a draft low-
