Office of Scientific Integrity, Office of Science,
Centers for Disease Control and Prevention.

[FR Doc. 2019-14303 Filed 7-3-19; 8:45 am]

BILLING CODE 4163-18-P

**DEPARTMENT OF HEALTH AND
HUMAN SERVICES**
**Centers for Disease Control and
Prevention**

[60Day-19-19BCG; Docket No. CDC-2019-
0053]

**Proposed Data Collection Submitted
for Public Comment and
Recommendations**

AGENCY: Centers for Disease Control and
Prevention (CDC), Department of Health
and Human Services (HHS).

ACTION: Notice with comment period.

SUMMARY: The Centers for Disease
Control and Prevention (CDC), as part of
its continuing effort to reduce public
burden and maximize the utility of
government information, invites the
general public and other Federal
agencies the opportunity to comment on
a proposed and/or continuing
information collection, as required by
the Paperwork Reduction Act of 1995.
This notice invites comment on a
proposed information collection project
titled Core Elements of Antimicrobial
Stewardship in Nursing Homes. The
goal of the information collection is to
assess the impact of an intervention on
the knowledge, attitudes, practices, and
perceived provider-level barriers to
appropriate antibiotic prescribing in a
sample of health care providers in
nursing homes. The data will be used to
monitor the effect of an intervention
aimed at improving the antibiotic
stewardship behaviors of prescribers in
long-term care settings.

DATES: CDC must receive written
comments on or before September 3,
2019.

ADDRESSES: You may submit comments,
identified by Docket No. CDC-2019-
0053 by any of the following methods:

- *Federal eRulemaking Portal:*
Regulations.gov. Follow the instructions
for submitting comments.
- *Mail:* Jeffrey M. Zirger, Information
Collection Review Office, Centers for
Disease Control and Prevention, 1600
Clifton Road NE, MS-D74, Atlanta,
Georgia 30329.

Instructions: All submissions received
must include the agency name and
Docket Number. CDC will post, without
change, all relevant comments to
Regulations.gov.

Please note: Submit all comments
through the Federal eRulemaking portal
(*regulations.gov*) or by U.S. mail to the
address listed above.

FOR FURTHER INFORMATION CONTACT: To
request more information on the
proposed project or to obtain a copy of
the information collection plan and
instruments, contact Jeffrey M. Zirger,
Information Collection Review Office,
Centers for Disease Control and
Prevention, 1600 Clifton Road NE, MS-
D74, Atlanta, Georgia 30329; phone:
404-639-7570; Email: *omb@cdc.gov.*

SUPPLEMENTARY INFORMATION: Under the
Paperwork Reduction Act of 1995 (PRA)
(44 U.S.C. 3501-3520), Federal agencies
must obtain approval from the Office of
Management and Budget (OMB) for each
collection of information they conduct
or sponsor. In addition, the PRA also
requires Federal agencies to provide a
60-day notice in the **Federal Register**
concerning each proposed collection of
information, including each new
proposed collection, each proposed
extension of existing collection of
information, and each reinstatement of
previously approved information
collection before submitting the
collection to the OMB for approval. To
comply with this requirement, we are
publishing this notice of a proposed
data collection as described below.

The OMB is particularly interested in
comments that will help:

1. Evaluate whether the proposed
collection of information is necessary
for the proper performance of the
functions of the agency, including
whether the information will have
practical utility;
2. Evaluate the accuracy of the
agency's estimate of the burden of the
proposed collection of information,
including the validity of the
methodology and assumptions used;
3. Enhance the quality, utility, and
clarity of the information to be
collected; and
4. Minimize the burden of the
collection of information on those who
are to respond, including through the
use of appropriate automated,
electronic, mechanical, or other
technological collection techniques or
other forms of information technology,
e.g., permitting electronic submissions
of responses.
5. Assess information collection costs.

Proposed Project

Core Elements of Antimicrobial
Stewardship in Nursing Homes—New—
National Center for Emerging and
Zoonotic Infectious Diseases (NCEZID),
Centers for Disease Control and
Prevention (CDC).

Background and Brief Description

The purpose of this survey is to
follow-up on formative research (OMB
Control Number 0920-1154), which
assessed the knowledge, attitudes,
practices and perceived provider-level
barriers to appropriate antibiotic
prescribing in a sample of health care
providers in nursing homes. This survey
was developed building upon
foundational work previously
completed. The questions were
originally pre-tested among a select
group (n=9) of prescribers recruited
from the participating corporations to
both obtain responses, as well as
performing cognitive assessment to
ensure clarity and robustness of content.

The preliminary findings suggested
that the questions presented were clear
and correctly understood and that the
topics covered were meaningful. The
inclusion of length of time in practice
was specifically relevant as preliminary
findings from the interviews, albeit
limited, suggest that a prescriber's
approach and attitudes surrounding
antibiotic prescribing may be impacted
by professional tenure. Specifically,
respondents described that the longer a
prescriber had been in practice, the
more reluctant they were to modify their
prescribing behaviors.

General findings consistently centered
on the variability in nurse/provider
communication. Themes of poor
communication encompassed multiple
elements. Key themes included: Poor
structure of information sharing, the
role of gatekeepers to the prescriber,
insufficient or otherwise irrelevant
detail, and an absence of therapy
recommendation from the nurses.
Additionally, respondents described the
physical environment/geographic
context that contributed to possible
instances of over-prescribing: Limited
availability of timely or rapid test
laboratory results, sites with affiliated
labs that are closed on the weekends
(thus requiring a staff member to drive
a sample multiple hours to the nearest
hospital), limited antibiotic options in
the facility's Emergency Kit (from which
staff frequently draw when starting a
prescription).

The current phase incorporates the
findings from previous exploratory work
and aims to address the quality of
communication between the nurses and
prescribers while also respecting the
rational for initial antibiotic initiation.
As the decision to initiate an antibiotic
prescription is largely influenced by
factors beyond the scope of this project,
the current study targeted the role of the
antibiotic follow-up to engage the
prescriber post-prescription to reassess

the appropriateness of the initial prescription. Additional topics were identified as important to the respondents as they expressed support to include questions that cover individual perceptions of responsibility/autonomy, the importance of the role of family and other social pressures when deciding to make antibiotic decisions, and the process of following up with the resident post-prescription. The group of respondents were comprised of a semi-convenience sample, with efforts to target key administrative and practicing roles within the healthcare setting to

obtain a diverse and inclusive perspective.

Information will be used to provide descriptive analysis reports of the prescribing climate within long-term care settings. We will use these data as comparison to the initial survey deployment to characterize any change demonstrated within the current antimicrobial stewardship environment with an effort to identify key elements based on staff interactions, perceived challenges, and any identifiable gaps in knowledge. The specific elements within the survey will be used to identify common needs shared across

prescribers as areas for further training or intervention development (e.g., identified barriers to education or training resources will result in a more robust education component to be included in future work). While this second survey is not intended to establish a direct causal relationship, it does aim to capture differences in a pre/post analysis style review without which, the initial survey would simply provide a snapshot of current levels of knowledge, attitudes, practices and perceived provider-level barriers to appropriate antibiotic prescribing.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondents	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden (in hours)
Doctors	Core Elements of Antimicrobial Stewardship in Nursing Homes.	75	1	30/60	38
Nurse Practitioners	Core Elements of Antimicrobial Stewardship in Nursing Homes.	25	1	30/60	12
Total	50

BILLING CODE 4163-18-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[30Day-19-19ACB]

Agency Forms Undergoing Paperwork Reduction Act Review

In accordance with the Paperwork Reduction Act of 1995, the Centers for Disease Control and Prevention (CDC) has submitted the information collection request titled “The Drug Overdose Surveillance and Epidemiology (DOSE)” to the Office of Management and Budget (OMB) for review and approval. CDC previously published a “Proposed Data Collection Submitted for Public Comment and Recommendations” notice on April 2, 2019 to obtain comments from the public and affected agencies. CDC received one comment related to the previous notice. This notice serves to allow an additional 30 days for public and affected agency comments.

CDC will accept all comments for this proposed information collection project.

The Office of Management and Budget is particularly interested in comments that:

(a) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(b) Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(c) Enhance the quality, utility, and clarity of the information to be collected;

(d) Minimize the burden of the collection of information on those who are to respond, including, through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses; and

(e) Assess information collection costs.

To request additional information on the proposed project or to obtain a copy of the information collection plan and instruments, call (404) 639-7570 or send an email to omb@cdc.gov. Direct written comments and/or suggestions regarding the items contained in this notice to the Attention: CDC Desk Officer, Office of Management and Budget, 725 17th Street NW,

Washington, DC 20503 or by fax to (202) 395-5806. Provide written comments within 30 days of notice publication.

Proposed Project

Drug Overdose Surveillance and Epidemiology (DOSE)—New—National Center for Injury Prevention and Control (NCIPC), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The rapid increase in opioid overdose deaths since 2013, numerous severe fentanyl and fentanyl analog outbreaks occurring since 2015 across the United States, and the declaration of the opioid overdose epidemic as a national public health emergency on October 26, 2017 have highlighted the urgent need to rapidly establish and enhance timely surveillance of suspected drug, opioid, heroin, and stimulant overdoses. These data are critical to inform timely local, state, and regional response, especially to acute and/or widespread multi-state outbreaks.

This new data collection effort is an essential component toward reducing the opioid crisis, one of HHS Department’s top priorities. DOSE data is critical to our ability to rapidly identify outbreaks and provide situational awareness of changes in emergency department (ED) visits involving suspected drug, opioid, heroin and stimulant overdoses at the local, state, and regional level. This will
