SUPPLEMENTARY INFORMATION:

I. Introduction

The NRC is considering a license renewal request for SNM-2509 for the Trojan specifically-licensed ISFSI located in Columbia County, Oregon (ADAMS Accession No. ML17086A039). The applicant, Portland General Electric Company (PGE), is requesting to renew license SNM-2509 for the Trojan ISFSI for an additional 40-year period. The current license expired on March 31, 2019. PGE submitted the license renewal application in accordance with paragraphs 72.42(b) and (c) of title 10 of the *Code of Federal Regulations* (10 CFR). Accordingly, the NRC considers the license in timely renewal. If approved, PGE would be able to continue to possess and store spent nuclear fuel at the Trojan ISFSI in accordance with the requirements in 10 CFR part 72, "Licensing Requirements for the Independent Storage of Spent Nuclear Fuel, High-Level Radioactive Waste, and Reactor-Related Greater than Class C Waste."

The NRC staff has prepared a final EA as part of its review of this license renewal request in accordance with the requirements of 10 CFR part 51, "Environmental Protection Regulations for Domestic Licensing and Related Regulatory Functions." Based on the final EA, the NRC has determined that an environmental impact statement (EIS) is not required for this proposed action and a FONSI is appropriate. The NRC is also conducting a safety evaluation of the proposed license amendment pursuant to 10 CFR part 72 and the results will be documented in a separate Safety Evaluation Report (SER). If PGE's request is approved, the NRC will issue the license renewal following publication of this final EA
