In 1938, human remains representing, at minimum, four adult individuals were removed from southwestern KY by T.M.N. Lewis (University of Tennessee archeology instructor) and donated to MPM. The age of individuals cannot be determined. No known individuals were identified. The nine associated funerary objects are pottery sherds that approximately date to the Late Woodland/Mississippian time periods.

Determinations Made by the Milwaukee Public Museum

with the United States District Court for the Central District of California in the lawsuit entitled *United States and the State of California v. ITT LLC, et al.*, Civil Action No. 2:99-cv-00552.

In 1999, the United States and the State of California Department of Toxic Substances Control filed a lawsuit against numerous parties under the Comprehensive Environmental Response, Compensation, and Liability Act in connection with groundwater contamination at the Glendale North and South Operable Units of the San Fernando Valley (Area 2) Superfund Site in and around Glendale, California. Pursuant to the consent decree, certain settling defendants (referred to in the consent decree as “Settling Work Defendants”) have been performing response actions at the site in coordination with the City of Glendale.

The proposed Second Joint Stipulation provides that (1) the Settling Work Defendants will not request a Certificate of Completion regarding the work before November 30, 2024, and they and the City of Glendale shall continue to perform their respective actions until at least November 30, 2024, and (2) the Settling Work Defendants agree to pay to the U.S. Environmental Protection Agency (EPA) their allocated share of “Basin-Wide Future Response Costs” (as that term is defined in the consent decree) paid by EPA on or after October 1, 2016.

Notice of Lodging of Proposed Consent Decree Under the Comprehensive Environmental Response, Compensation, and Liability Act (“CERCLA”)

On May 6, 2019, the Department of Justice lodged a proposed consent decree with the United States District Court for the District of New Jersey in the lawsuit entitled *United States of America, New Jersey Department of Environmental Protection, and Administrator of the New Jersey Spill Compensation Fund v. Ford Motor Co. and the Borough of Ringwood*, Civil Action No. 2:19-cv-12157.

The United States seeks reimbursement of response costs incurred under Section 107(a) of the Comprehensive Environmental Response, Compensation, and Liability Act (“CERCLA”) for response actions at or in connection with the release or threatened release of hazardous substances at Operable Unit 2 of the Ringwood Mines/Landfill Superfund Site (the “Site”) in Ringwood, New Jersey.

Under the proposed consent decree, Settling Defendants will remove contaminated soil and install caps at three locations within the Site: The Peters Mine Pit Area, the Cannon Mine Pit Area, and the O’Connor Disposal Area. In conjunction with the soil remediation, the Borough of Ringwood will install a recycling center on the O’Connor Disposal Area. The proposed consent decree requires Ford Motor Company to pay approximately \$5.7 million for past response costs of both the United States and the State of New Jersey. The proposed consent decree will resolve the United States’ CERCLA

claims alleged in this action, and the New Jersey Department of Environmental Protection’s Spill Act claims alleged in this action. The proposed consent decree will not resolve claims related to groundwater contamination at the Site, which will be addressed at a future point.
