

Agenda

The committee will receive and discuss a Plan Development Team report on incentive-based measures, how they can be used in a Fishery Ecosystem Framework with harvest control rules for stock complexes. These options will be incorporated into an example Fishery Ecosystem Plan (eFEP) which is scheduled to be presented to the Council at its September meeting. Related issues for drafting an eFEP and other ecosystem management activities, including further evaluation of jurisdiction and co-management for Georges Bank stock complexes, may be discussed. Other business may be discussed as necessary.

Although non-emergency issues not contained on this agenda may come before this Council for discussion, those issues may not be the subject of formal action during this meeting. Council action will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Act, provided the public has been notified of the Council's intent to take final action to address the emergency.
