745.227. However, authorized tribes are under no obligation to continue to administer the LBP Activities program, and if they do not wish to adopt new DLHS they can relinquish their authorization. In the absence of a Tribal authorization, EPA will administer these requirements. Thus, Executive Order 13175 does not apply to this action.

H. Executive Order 13045: Protection of Children From Environmental Health Risks and Safety Risks

This action is subject to Executive Order 13045 (62 FR 19885, April 23, 1997), because it is economically significant as defined in Executive Order 12866, and because the environmental health or safety risk addressed by this action may have a disproportionate effect on children. (Ref. 18)

The primary purpose of this rule is to reduce exposure to dust-lead hazards in target housing where children reside and in target housing or COFs. EPA’s analysis indicates that there will be approximately 50,000 to 200,000 children per year affected by the rule (Ref. 14).

I. Executive Order 13211: Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution or Use

This action is not a “significant energy action” as defined in Executive Order 13211 (66 FR 28355, May 22, 2001), because it is not likely to have a significant adverse effect on the supply, distribution or use of energy.

J. National Technology Transfer and Advancement Act (NTTAA)

Since this rulemaking does not involve technical standards, NTTAA section 12(d) (15 U.S.C. 272 note) does not apply to this action.

K. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations

This action is not expected to have disproportionately high and adverse human health or environmental effects on minority populations, low-income populations and/or indigenous peoples, as specified in Executive Order 12898 (59 FR 7629, February 16, 1994). The documentation for this decision is contained in the Economic Analysis, which is available in the docket (Ref. 14). EPA’s Economic Analysis estimates that the average baseline blood lead levels of children who are affected by the rule (particularly children in minority and low-income households) are higher than the nationwide average. The revised hazard standards would reduce exposure to lead for all residents of affected housing. Therefore, EPA has determined that the regulatory options will not have disproportionately high and adverse human health or environmental effects on any population, including any minority population or low-income population.

L. Congressional Review Act (CRA)

This action is subject to the CRA, 5 U.S.C. 801 et seq., and the EPA will submit a rule report to each House of the Congress and to the Comptroller General of the United States. This action is a “major rule” as defined by 5 U.S.C. 804(2).

List of Subjects in 40 CFR Part 745

Environmental protection, Hazardous substances, Lead poisoning, Reporting and recordkeeping requirements.

Dated: June 21, 2019.

Andrew R. Wheeler,
Administrator.

Therefore, 40 CFR chapter I, subchapter R, is amended as follows:

PART 745—[AMENDED]

1. The authority citation for part 745 continues to read as follows:

2. In § 745.65, paragraph (b) is revised to read as follows:

§ 745.65 Lead-based paint hazards.

(b) Dust-lead hazard. A dust-lead hazard is surface dust in a residential dwelling or child-occupied facility that contains a mass-per-area concentration of lead equal to or exceeding 10 µg/ft² on floors or 100 µg/ft² on interior window sills based on wipe samples.

3. In § 745.227, paragraph (h)(3)(i) is revised to read as follows:

§ 745.227 Work practice standards for conducting lead-based paint activities: target housing and child-occupied facilities.

(h) * * *(3) * * *

(i) In a residential dwelling on floors and interior window sills when the weighted arithmetic mean lead loading for all single surface or composite samples of floors and interior window sills are equal to or greater than 10 µg/ft² for floors and 100 µg/ft² for interior window sills, respectively;

4. In § 745.325, paragraph (e) is revised to read as follows:

§ 745.325 Lead-based paint activities: State and Tribal program requirements.

(e) Revisions to lead-based paint activities program requirements. When EPA publishes in the Federal Register revisions to the lead-based paint activities program requirements contained in subpart L of this part:

1. A State or Tribe with a lead-based paint activities program approved before the effective date of the revisions to the lead-based paint activities program requirements in subpart L of this part must demonstrate that it meets the requirements of this section in a report that it submits pursuant to § 745.324(h) but no later than two years after the effective date of the revisions.

2. A State or Tribe submitting an application for approval of a lead-based paint activities program submitted but not approved before the effective date of the revisions to the lead-based paint activities program requirements in subpart L of this part must demonstrate that it meets the requirements of this section either by amending its application or in a report that it submits pursuant to § 745.324(h) but no later than two years after the effective date of the revisions.

3. A State or Tribe submitting its application for approval of a lead-based paint activities program on or after the effective date of the revisions must demonstrate in its application that it meets the requirements of the new lead-based paint activities program requirements in subpart L of this part.

Snapper-Grouper Fishery of the South Atlantic; 2019 Commercial Accountability Measure and Closure for the Other Jacks Complex

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; closure.

SUMMARY: NMFS implements an accountability measure (AM) for the
SUPPLEMENTARY INFORMATION:

FOR FURTHER INFORMATION CONTACT:
Mary Vara, NMFS Southeast Regional Office, telephone: 727–824–5305, email: mary.vara@noaa.gov.

SPECIAL SUPPLEMENTARY INFORMATION: The snapper-grouper fishery of the South Atlantic includes lesser amberjack, almaco jack, and banded rudderfish, which combined are the Other Jacks Complex. The Other Jacks Complex is managed under the Fishery Management Plan for the Snapper-Grouper Fishery of the South Atlantic Region (FMP). The FMP was prepared by the South Atlantic Fishery Management Council and is implemented by NMFS under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act) by regulations at 50 CFR part 622.

The commercial ACL for the Other Jacks Complex is 189,422 lb (85,920 kg), round weight. Under 50 CFR 622.193(l)(1)(i), NMFS is required to close the commercial sector for the Other Jacks Complex when the commercial ACL has been reached, or projected to be reached, by filing a notification to that effect with the Office of the Federal Register. NMFS has determined that the commercial sector for this complex is projected to reach its ACL by July 16, 2019. Therefore, this temporary rule implements an AM to close the commercial sector for the Other Jacks Complex in the South Atlantic, effective at 12:01 a.m., local time, on July 16, 2019.

The operator of a vessel with a valid commercial permit for South Atlantic snapper-grouper having lesser amberjack, almaco jack, or banded rudderfish on board must have landed and bartered, traded, or sold such species prior to 12:01 a.m., local time, on July 16, 2019. During the commercial closure, the recreational bag limit specified in 50 CFR 622.187(b)(8) and the possession limits specified in 50 CFR 622.187(c) apply to all harvest or possession of lesser amberjack, almaco jack, or banded rudderfish in or from the South Atlantic EEZ, while the recreational sector is open. These recreational bag and possession limits apply in the South Atlantic on board a vessel for which a valid Federal commercial or charter vessel/headboat permit for South Atlantic snapper-grouper has been issued, regardless of whether such species were harvested in state or Federal waters. During the commercial closure, the sale or purchase of lesser amberjack, almaco jack, or banded rudderfish taken from the South Atlantic EEZ is prohibited.

Classification

The Regional Administrator for the NMFS Southeast Region has determined that the need to immediately implement this action to close the commercial sector for the Other Jacks Complex constitutes good cause to waive the requirements to provide prior notice and opportunity for public comment pursuant to the authority set forth in 5 U.S.C. 553(b)(B), as such procedures are unnecessary and contrary to the public interest. Such procedures are unnecessary because the rule implementing the AM itself has been subject to notice and comment, and all that remains is to notify the public of the closure. Such procedures are contrary to the public interest because of the need to immediately implement this action to protect the species in the Other Jacks Complex, since the capacity of the fishing fleet allows for rapid harvest of the commercial ACL. Prior notice and opportunity for public comment would require time and would potentially result in a harvest well in excess of the established commercial ACL.

For the aforementioned reasons, the AA also finds good cause to waive the 30-day delay in the effectiveness of this action under 5 U.S.C. 553(d)(3).

Authority: 16 U.S.C. 1801 et seq.

Jennifer M. Wallace,
Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

Fisheries of the Northeastern United States; Northeast Multispecies Fishery; Fishing Year 2019 Recreational Management Measures

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule.

SUMMARY: This action adjusts fishing year 2019 recreational management measures for Gulf of Maine cod and haddock and Georges Bank cod. This action is necessary to respond to updated scientific information and to achieve the goals and objectives of the Northeast Multispecies Fishery Management Plan. The intended effect of this action is to achieve, but not exceed, the fishing year 2019 recreational catch limits.

DATES: Effective July 5, 2019.

ADDRESSES: Analyses supporting this rulemaking include the environmental assessment for Framework Adjustment 57 to the Northeast Multispecies Fishery Management Plan that the New England Fishery Management Council prepared. Copies of this analysis are available from: Michael Pentony, Regional Administrator, National Marine Fisheries Service, 55 Great Republic Drive, Gloucester, MA 01930. The supporting documents are also accessible via the internet at: http://www.nefmc.org/management-plans/northeast-multispecies.

SUPPLEMENTARY INFORMATION:
