

CFR part 52, “Licenses, Certifications and Approvals for Nuclear Power Plants.” Existing licensees and applicants of final design certification rules will not be required to comply with the positions set forth in this draft regulatory guide. Further information on the staff’s use of the draft regulatory guide, if finalized, is contained in the draft regulatory guide under Section D., “Implementation.”

Applicants and potential applicants are not, with certain exceptions, protected by either the Backfit Rule or any issue finality provisions under 10 CFR part 52. Neither the Backfit Rule nor the issue finality provisions under 10 CFR part 52—with certain exclusions discussed below—were intended to apply to every NRC action which substantially changes the expectations of current and future applicants. Therefore, the positions in any final draft regulatory guide, if imposed on applicants, would not represent backfitting (except as discussed below).

The exceptions to the general principle are applicable whenever a 10 CFR part 50 operating license applicant references a construction permit or a combined license applicant references a 10 CFR part 52 license (*i.e.*, an early site permit or a manufacturing license) or regulatory approval (*i.e.*, a design certification rule or design approval). The staff does not, at this time, intend to impose the positions represented in the draft regulatory guide in a manner that is inconsistent with the Backfit Rule or any issue finality provisions in these 10 CFR part 52 licenses and regulatory approvals. If, in the future, the staff seeks to impose a position in this regulatory guide in a manner that constitutes backfitting under the Backfit Rule or does not provide issue finality as described in the applicable issue finality provision, then the staff will address the backfitting provisions in the Backfit Rule or criteria for avoiding issue finality as described in the applicable issue finality provision.

This RG also describes the acceptable format and content of LTPs for nuclear power reactor licensees to terminate their licenses and release their sites. Revision 2 does not contain substantive changes in the NRC staff’s regulatory guidance since Revision 1 was issued. It provides updated references, minor corrections, and other editorial changes.

**DATES:** Revision 2 to RG 1.179 is available on July 30, 2019.

#### SUPPLEMENTARY INFORMATION:

##### I. Discussion

The NRC is issuing a revision to an existing guide in the NRC’s “Regulatory Guide” series. This series was developed to describe and make available to the public information regarding methods that are acceptable to the NRC staff for implementing specific parts of the agency’s regulations, techniques that the NRC staff uses in evaluating specific issues or postulated events, and data that the NRC staff needs in its review of applications for permits and licenses.

The NRC typically seeks public comment on a draft version of a regulatory guide by announcing its availability for comment in the **Federal Register**. However, the NRC may directly issue a final regulatory guide without a draft version or public comment period if the changes to the regulatory guide are non-substantive.

The NRC is issuing Revision 2 of RG 1.179 directly as a final RG because the changes are non-substantive. Revision 2 of RG 1.179 incorporates updated references, minor corrections, and other editorial changes to be aligned with NUREG-1700, “Standard Review Plan for Evaluating Nuclear Power Reactor License Termination Plans,” Revision 2, issued April 2018. The changes in Revision 2 of the RG are administrative in nature. The changes are intended to improve clarity and do not substantially alter the NRC staff’s regulatory guidance for the acceptable format and content of LTPs for nuclear power reactor licensees.

##### II. Backfitting and Issue Finality

Issuance of this regulatory guide does not constitute backfitting as defined in

title 10 of the *Code of Federal Regulations* (10 CFR) 50.109, “Backfitting” (the Backfit Rule), and is not otherwise inconsistent with the issue finality provisions in 10 CFR part 52. As discussed in the “Implementation” section of RG 1.179, revision 2, the NRC has no current intention to impose the RG on current holders of an operating license or combined license.

### III. Congressional Review Act

This RG is a rule as defined in the Congressional Review Act (5 U.S.C. 801–808). However, the Office of Management and Budget has not found it to be a major rule as defined in the Congressional Review Act.

### IV. Submitting Suggestions for Improvement of Regulatory Guides

Revision 2 of RG 1.179 is being issued without public comment. However, you may at any time submit suggestions to the NRC for improvement of existing RGs or for the development of new RGs to address new issues. Suggestions can be submitted by the form available online at <https://www.nrc.gov/reading-rm/doc-collections/reg-guides/contactus.html>. Suggestions will be considered in future updates and enhancements of the RG.
