SUPPLEMENTARY INFORMATION:**I. Background**

U.S.C. 813(h), authorizes MSHA to collect information necessary to carry

out its duty in protecting the safety and health of miners. Further, section 101(a) of the Mine Act, 30 U.S.C. 811, authorizes the Secretary of Labor to develop, promulgate, and revise as may be appropriate, improved mandatory health or safety standards for the protection of life and prevention of injuries in coal and metal and nonmetal mines.

Continuous Personal Dust Monitors (CPDMs) determine the concentration of respirable dust in coal mines. CPDMs must be designed and constructed for coal miners to wear and operate without impeding their ability to perform their work safely and effectively, and must be durable to perform reliably in normal working conditions of coal mines. Paperwork requirements imposed on applicants are related to the application process and CPDM testing procedures.
