• approximately 4 miles of new 36-inch-diameter pipeline with increased wall thickness in Mobile County;
• new metering equipment at Gulfstream’s existing Compressor Station 420 located in Manatee County; and
• related auxiliary facilities and appurtenances in Manatee County.

Gulfstream also plans to request a special permit from The U.S. Department of Transportation’s Pipeline and Hazardous Material Safety Administration to increase their maximum allowable operating pressure (MAOP) for approximately 50 miles of its 36-inch-diameter offshore pipeline. The increase in MAOP would require no construction offshore.

The general location of the project facilities is shown in appendix 1.1

Land Requirements for Construction

Construction of the proposed facilities would disturb about 50 acres of land. Following construction, Gulfstream would maintain about 1.5 acres for permanent operation of the project’s facilities; the remaining acreage would be restored and revert to former uses. One hundred percent of the proposed pipeline route parallels existing pipeline, utility, or road rights-of-way.

The EA Process

The EA will discuss impacts that could occur as a result of the construction and operation of the proposed project under these general headings:

• Geology and soils;
• water resources and wetlands;
• vegetation and wildlife;
• threatened and endangered species;
• cultural resources;
• land use;
• air quality and noise;
• public safety; and
• cumulative impacts

Commission staff will also evaluate reasonable alternatives to the proposed project or portions of the project, and make recommendations on how to lessen or avoid impacts on the various resource areas.

The EA will present Commission staffs’ independent analysis of the issues. The EA will be available in electronic format in the public record through eLibrary and the Commission’s website (https://www.ferc.gov/industries/gas/enviro/eis.asp). If eSubscribed, you will receive instant email notification when the EA is issued. The EA may be issued for an allotted public comment period.

Consultation Under Section 106 of the National Historic Preservation Act

In accordance with the Advisory Council on Historic Preservation’s implementing regulations for section 106 of the National Historic Preservation Act, the Commission is using this notice to initiate consultation with the applicable State Historic Preservation Offices, and to solicit their views and those of other government agencies, interested Indian tribes, and the public on the project’s potential effects on historic properties. The EA for this project will document findings on the impacts on historic properties and summarize the status of consultations under section 106.

Environmental Mailing List

The environmental mailing list includes federal, state, and local government representatives and agencies; elected officials; environmental and public interest groups; Native American Tribes; other interested parties; and local libraries and newspapers.

This list also includes all affected landowners (as defined in the Commission’s regulations) who are potential right-of-way grantees, whose property may be used temporarily for project purposes, or who own homes within certain distances of aboveground facilities, and anyone who submits comments on the project. Commission staff will update the environmental mailing list as the analysis proceeds to ensure that Commission notices related to this environmental review are sent to all individuals, organizations, and government entities interested in and/or potentially affected by the proposed project.

If the Commission issues the EA for an allotted public comment period, a Notice of Availability of the EA will be sent to the environmental mailing list and will provide instructions to access the electronic document on the FERC’s website (www.ferc.gov). If you need to make changes to your name/address, or if you would like to remove your name from the mailing list, please return the attached “Mailing List Update Form” (appendix 2).

Additional Information

Additional information about the project is available from the Commission’s Office of External Affairs, at (866) 208–FERC, or on the FERC website at www.ferc.gov using the eLibrary link. Click on the eLibrary link, click on “General Search” and enter the docket number in the “Docket Number” field, excluding the last three digits (i.e., CP19–475). Be sure you have selected an appropriate date range. For assistance, please contact FERC Online Support at FercOnlineSupport@ferc.gov or (866) 208–3676, or for TTY, contact (202) 502–8659. The eLibrary link also provides access to the texts of all formal documents issued by the Commission, such as orders, notices, and rulemakings.

Public sessions or site visits will be posted on the Commission’s calendar located at www.ferc.gov/EventCalendar/EventsList.aspx along with other related information.

Dated: July 25, 2019.
Kimberly D. Bose,
Secretary.

[Project No. 2622–013]

Notice Soliciting Scoping Comments: Turners Falls Hydro, LLC

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection.

a. Type of Application: Subsequent Minor License.
b. Project No.: 2622–013.
d. Applicant: Turners Falls Hydro, LLC (Turners Falls Hydro).
e. Name of Project: Turners Falls Project.

f. Location: On the Connecticut River, in the power canal of the Turners Falls Hydroelectric Project No. 1889, in Franklin County, Massachusetts. No federal lands are occupied by the project works or located within the project boundary.

g. Filed Pursuant to: Federal Power Act 16 U.S.C. 791(a)–825(r).

h. Applicant Contact: Mr. Michael Scarzello, Director, Eagle Creek Renewable Energy, LLC, 65 Madison Avenue, Suite 500, Morristown, NJ 07960; Phone at (973) 998-8400, or email at michael.scarzello@eaglecreeke.com.

i. FERC Contact: Amanda Gill, (202) 502–6773 or amanda.gill@ferc.gov.

The Commission strongly encourages electronic filing. Please file scoring comments using the Commission’s eFiling system at http://www.ferc.gov/docs-filing/efiling.asp. Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at http://www.ferc.gov/docs-filing/eComment.asp. You must include your name and contact information at the end of your comments. For assistance, contact FERC Online Support at FERCOnlineSupport@ferc.gov, (866) 208–3676 (toll free), or (202) 502–8659 (TTY). In lieu of electronic filing, please send a paper copy to: Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426. The first page of any filing should include docket number P–2622–013.

The project's water rights include (i) pursuant to a Water Use Agreement with FirstLight; or (ii) without the operating constraints of the existing Water Use Agreement with FirstLight.

k. This application is not ready for environmental analysis at this time.

l. Project Description: The Turners Falls Project consists of: (1) An existing 10-foot-long, 20-foot-wide, 12- to 22-foot-high forebay; (2) a 20-foot-wide, 22-foot-high trashrack with 1.5-inch clear-bar spacing; (3) two 9.75-foot-wide, 10.3-foot-high headgates; (4) an 8.5-foot-diameter, 50-foot-long steel penstock; (5) a 77-foot-long, 42-foot-wide powerhouse containing one 937-kilowatt vertical Francis-type turbine-generating unit; and (6) a 50-foot-long, 10-foot-diameter draft tube; (7) an 80-foot-long, 10-foot-wide tailrace; (8) a 280-foot-long, 2.3-kilovolt generator lead line that connects the generator to a step-up transformer; and (9) appurtenant facilities.

When generating, the project withdraws up to 289 cubic feet per second from FirstLight Hydro Generating Company’s (FirstLight) power canal for the Turners Falls Hydroelectric Project No. 1889, and discharges directly into the Connecticut River. Turners Falls Hydro coordinates project operation with FirstLight via an off-license Water Use Agreement, which allows Turners Falls Hydro to generate only when flows within the power canal are greater than 15,000 cubic feet per second (cfs) and the needs of FirstLight’s Turners Falls Hydroelectric Project No. 1889 are met. When operating the project, Turners Falls Hydro uses the 289-cfs maximum hydraulic capacity of the turbine for hydroelectric generation and does not fluctuate its water use. The average annual generation of the project is approximately 1,512 megawatt-hours.

Turners Falls Hydro proposes to operate the project either: (1) On a continuous basis between the project’s minimum and maximum hydraulic capacities (60 cfs and 289 cfs, respectively), without the operating constraints of the off-license Water Use Agreement with FirstLight; (2) pursuant to the same provisions of the existing Water Use Agreement with FirstLight; or (3) pursuant to a modified Water Use Agreement with FirstLight.

m. A copy of the application is available for review at the Commission in the Public Reference Room or may be viewed on the Commission’s website at http://www.ferc.gov using the “eLibrary” link. Enter the docket number excluding the last three digits in the docket number field to access the document. For assistance, contact FERC Online Support. A copy is available for inspection and reproduction at the Montague Public Library, Carnegie Library Branch located at 201 Avenue A, Turners Falls, MA 01376.

n. You may also register online at http://www.ferc.gov/docs-filing/esubscription.asp to be notified via email of new filings and issuances related to this or other pending projects. For assistance, contact FERC Online Support.
